

GALAXY SPORTS EDGE

Brand Use Pack - Identity, Ecosystem, Copy, SEO, and Compliance Guardrails

Find the signal before the market moves.

GALAXY SPORTS EDGE

Find the signal before the market moves.

POSITIONING

A premium sports intelligence platform built around signal detection, market movement, confidence-rated insights, and disciplined decision support.

PROMISE

Not a picks gimmick. Not sportsbook hype. A calibrated system for seeing edge earlier and acting with more clarity.

STONE

Calm, precise, intelligent, future-facing, confident without guaranteeing outcomes.

GALAXY SPORTS EDGE | Find the signal before the market moves.

1. Executive Brand Decision

Galaxy Sports Edge is the selected flagship brand. It balances search clarity, sports-category recognition, and a premium intelligence-platform world. The brand should not behave like a sportsbook, picks tout, or promo-first gambling site. It should behave like a calibrated sports intelligence system.

2. Core Positioning

Element	Locked Direction
Brand Name	Galaxy Sports Edge
Primary Line	Find the signal before the market moves.
Category	Sports intelligence platform
Promise	Calibrated market signals, confidence-rated insights, and disciplined decision support.
Tone	Precise, restrained, premium, intelligent, never hype-driven.
Audience	Sports bettors, fantasy players, data-curious fans, and users seeking smarter sports-market context.

3. Product Ecosystem

- Galaxy IQ:** The proprietary intelligence engine powering models, confidence scoring, and signal detection.
- Signal Feed:** Daily AI-backed sports insights and recommendations, presented with context and confidence.
- Edge Map:** Market movement and opportunity visualization by sport, slate, matchup, and region.
- Orbit View:** Full-slate command center for browsing games, props, public pressure, and movement.
- Eclipse Lock:** Verified high-confidence state. Use as a confidence indicator, not as a guaranteed-win claim.
- Calibration Report:** Methodology, model transparency, accuracy tracking, and source confidence.
- Market Gravity:** Public pressure, line movement, and market imbalance tracking.
- Edge Index:** Composite confidence score that quantifies signal strength, volatility, and expected value context.

4. Visual Identity System

The visual system should feel like sports intelligence viewed through an orbital command interface: dark field, ion-white typography, cyan/magenta/violet signal states, restrained glow, disciplined negative space, and premium instrumentation. Avoid casino, sportsbook, mascot, crypto, and generic AI-star cues.

Color System

Color	Hex	Use
Obsidian Black	#050608	Primary background
Ion White	#F6F7FA	Primary text / monochrome mark
Orbital Cyan	#00E5FF	Signal, data, active states

Ion Magenta	#FF2DD6	Alert signal / emphasis
Soft Ultraviolet	#7A5CFF	Depth, intelligence, secondary signal
Steel Gray	#1A1D23	Panels, dividers, UI depth

5. Logo Direction - Remove Google G Risk

The final symbol should not be a literal circular G. The wordmark can say Galaxy. The symbol should say orbit + signal + edge. Preserve the diagonal edge vector, but reduce any resemblance to the Google G by breaking symmetry, avoiding Google-like circular letter memory, and emphasizing the detected advantage point rather than a letterform.

- One-color proof must work before gradients or glow.
- Symbol should survive favicon size without reading as a Google G.
- The diagonal vector should feel like edge detection, not a weapon or slash.
- The central signal point should become the memory hook.
- No red/yellow/green/blue Google-like color distribution.

6. SEO Architecture

Use the brand name for recall, but let site architecture carry search intent. The homepage should stay premium and clear; deeper pages should target high-intent search queries with useful, original content.

- /sports-betting-picks
- /ai-sports-predictions
- /player-prop-projections
- /nfl-picks
- /nba-picks
- /mlb-picks
- /nhl-picks

- /responsible-gaming

7. Safe Launch Copy

Asset	Copy
Hero H1	Find the signal before the market moves.
Hero Subhead	Galaxy Sports Edge turns market movement, projections, and confidence scoring into sharper sports decisions.
CTA Primary	Explore the Edge
CTA Secondary	View Methodology
Trust Line	Model-supported insights. Transparent confidence. No guaranteed outcomes.
Footer Disclaimer	Information is for educational and decision-support purposes only. Outcomes are not guaranteed. Wager responsibly and only where legal.

8. Copy and Compliance Guardrails

BRAND GUARDRAILS

Keep the edge. Remove the risk.

USE

sports intelligence, market signals, confidence-rated insights, decision support, model transparency.

AVOID

guaranteed wins, profit claims, lock of the day, free money, sportsbook mimicry, PrizePicks-style language, Google-G-like logo forms.

COMPLIANCE

Use responsible-gaming and outcome-risk language wherever betting-adjacent recommendations or affiliate links appear.

GALAXY SPORTS EDGE | Find the signal before the market moves.

- Do not imply guaranteed profit or guaranteed winning.
- Avoid “lock of the day,” “free money,” “sure thing,” and “risk-free” unless legally approved and contextually accurate.
- Use “confidence-rated signal” instead of “guaranteed pick.”
- Clearly distinguish projections, education, and decision support from wagering instructions.
- Include responsible-gaming and legal-availability language wherever betting-adjacent features or affiliate offers appear.

9. Master Creative Prompt for Future Design Work

Create a premium brand identity for Galaxy Sports Edge, a sports intelligence platform that detects signal before the market moves. The identity should feel like orbital edge detection, not a sportsbook and not a generic AI startup. Use obsidian black, ion white, orbital cyan, ion magenta, soft ultraviolet, and steel gray. Build a proprietary non-Google-like symbol based on an orbital field, a central signal point, and an edge vector crossing uncertainty. The logo must work in one color, favicon size, social avatar, dashboard UI, merch, and app icon. The tone is disciplined, intelligent, premium, and calm. Avoid guaranteed-win language, gambling hype, sportsbook green, mascots, shields, crypto icons, AI sparkles, and Google-G-like circular letterforms.

10. Current Visual Reference

Use this board as a visual direction reference only. The final logo should continue reducing Google-G resemblance while preserving the Galaxy Sports Edge world.

BRAND IDENTITY

BRAND MEANING

Galaxy Sports Edge is a next-gen sports intelligence platform that uses proprietary AI to detect market inefficiencies, measure edge, and deliver high-confidence plays before the world catches on.
