DOUG'S CRAFTCO SALES KIT

Craftco — Houston / Texas Territory. Everything you need, in one place.

Read this top part once. Do the 4 things every day. When you call, use the words on the next page.

THE MACHINE (memorize this)

Target → Call / Visit → Ask for the next step → Write it down → Follow up.

EVERY DAY — do these 4 things

1. Make 5 new contacts (call, email, or walk in) — that's 25 a week.
2. Follow up with every warm account that owes you a next step.
3. On every call, ask the 4 questions (below).
4. Write down what happened and the next step. Done.

EVERY WEEK — the numbers

• 25 new contacts • 8 meetings (minimum)

THE 4 QUESTIONS (ask every prospect)

1. What would you need to see from us to quote your work? (drawings / specs)
2. Who handles purchasing, and who handles engineering here?
3. Do I need to get Craftco set up as an approved vendor?
4. What's your next project, and roughly when?

THE ONE LINE TO SAY

“I live right here in Houston, so you've got a local point of accountability — backed by a big Wyoming shop built for the planned, large, or high-spec jobs the local shops are too slammed to take. We're not your emergency guy — we're your quality partner for the work you plan ahead.”

WHAT WE DO (say it this simple)

We build custom metal parts. We cut, bend, weld, and machine — made to your drawings.

3 THINGS THAT MAKE US SPECIAL

1. WE GO BIG. Two 10-ton cranes, 30-ft doors on three sides, water jet that cuts up to 12" thick. Too big for most local shops.

2. WE HANDLE TOUGH METAL. Steel, stainless, titanium, and the hard alloys — Inconel, Hastelloy, Duplex.

3. CERTIFIED QUALITY. ISO 9001 certified. AWS D1.1 certified welders. In-house Certified Weld Inspector.

WHO TO CALL ON / WHAT WE'RE NOT

✔ Plants & shops needing BIG or HARD-METAL parts
✔ Makers who need overflow help when they're slammed
✔ Precast plants (steel forms, embed plates, inserts)
✔ Anyone who PLANS jobs ahead
✘ NOT the same-day emergency repair guy — local shops win those
✘ NO price without drawings or a sample part
✘ We're in Wyoming — we win PLANNED work, not rush jobs

WHO NEEDS WHAT — the pitch for each type

Type	What they need	The ONE question to ask
Precast & Concrete	Steel forms, embeds, inserts, form repair. **Best fit.**	“Who builds your forms now? Can we quote your next one?”
Equipment & Crane Makers	Machined parts, weldments, overflow when slammed.	“What do you send out? Who's your overflow shop?”
Aggregate & Mining	Wear plate, chutes, screens, crusher parts.	“What wears out most? Who builds your wear parts?”
Petrochem / Refinery	Fabricated parts during turnarounds; overflow.	“When your shop maxes out, can we be your overflow?”
Oilfield Parts	Machined parts in tough alloys; runs.	“What do you machine vs. buy? Can we quote a run?”
Plant Maintenance	Replacement parts, brackets, shutdown work.	“Who's your MRO buyer? What do you reorder?”

EVERY TIME: leave with drawings or a sample part. No drawings = no price.

PHONE OPENER (15 seconds)

“Hi, this is Doug Baxley with Craftco. I'm based right here in Houston — custom metal fabrication, machining, and welding. I'm not selling anything today. I just want to know who handles your fabricated or machined parts, so when a job's too big or your usual shop is slammed, you've got a quality option.”

EMAIL #1 — COLD INTRO

Subject: Houston-based fab & machine partner for [Company]

Hi [Name], I'm Doug Baxley with Craftco — custom metal fabrication, CNC machining, and welding. I live and work in Houston, so you'd have a local contact, backed by a 25,000 sq ft shop with water jet, laser, and 10-ton cranes for larger jobs. I'm not asking you to switch anything — just to be on your list for the next planned project or overflow job. Could I send a one-page capability sheet and get 15 minutes?

— Doug Baxley | Craftco | [phone] | [email]

EMAIL #2 — FOLLOW-UP

Subject: Following up — [what you discussed]

Hi [Name], good talking with you [day]. You mentioned [project / part]. To put a number in front of you, the next step is [drawings / a spec / a sample]. Send that over and I'll turn a quote around quick — or I'm local, happy to swing by and pick it up.

— Doug

Keep email legal (CAN-SPAM): real subject, include Craftco's address (680 Airfield Lane, Sheridan WY 82801), give an opt-out, and honor it.

YOUR 5 WARM ACCOUNTS — DO THESE FIRST

Account	The one move that advances it
TD Oilfield Parts	Get drawings/specs. Ask: “What's the first part you'd let us quote?”
Tricon Precast	Ask to quote a form, embed run, or form-repair job. Get a sample drawing.
General Technologies	Find the buyer AND the engineer. Ask what they outsource now.
Wagner's	Confirm what they make vs. buy. Ask for one project to quote.
Georgia-Pacific	Find the MRO buyer at the plant. Ask about recurring parts + shutdowns.
