URGENT ATTORNEY HANDOFF PACKET

Garrett Baxley v. Turner / CTS Lonestar - Termination, Severance, Device/iCloud Issue, and Evidence Audit

Prepared from current chat, uploaded Turner ZIPs, Google Drive connector search/fetch results, and user-provided post-call facts. Generated 2026-06-05 UTC.

0. Read First - Time-Sensitive Counsel Decisions

Severance deadline: Garrett reports only about one day remains to decide whether to sign. Counsel should review the actual severance agreement before any signature, counter, or rejection.

Turner position is now written: Rodney Pope wrote that Turner will not reverse termination and reframed the rationale as local leadership losing confidence in Garrett's HR performance, collaboration, and adherence to leadership direction.

Device/iCloud issue now written: Rodney also wrote that "inappropriate images were recently discovered" on the company-issued device. Garrett states the content synced from personal iCloud, was never shown/sent/posted/distributed/threatened, and was first seen by Turner only after post-termination device review.

Do not keep negotiating alone: Given severance deadline + sensitive device issue + after-acquired evidence risk, the next move should be counsel-led or at least counsel-reviewed.

No evidence destruction: Do not wipe, delete, alter, clean, rename, move, or "fix" any file, phone backup, iCloud item, message, image, or evidence folder.

No witness contact yet: Do not contact Thomas Milo / Google, Tandee Butler, the coworker, IT/IS, or former coworkers without counsel approval.

Important boundary: this OSHA/safety lane should be kept separate from the post-termination device/iCloud issue. If Turner discovered the device content after termination, it should not be allowed to retroactively become the original termination motive. Counsel should evaluate after-acquired evidence separately.

Evidence to preserve now: full message thread with the on-site medical professional; name/title/company of the medical professional; safety / critical incident timeline; Thomas Milo 30+ minute Google-side safety discussion; calendar/notes showing Kevin intake interrupted by a safety incident; CTS ER Concern / Alignment email; any SafetyNet records; incident reports; emergency response planning files; medical-team/Amphibious communications; helipad/transport communications; and any owner/client reporting involving Google.

Source support already located: the emergency-response operating-system file describes a rural multi-employer construction project with an emergency readiness plan, dedicated medical team, and helipad, and frames the weakness as command-and-coordination rather than equipment. The HR crisis-governance work-product report documents emergency response coordination, on-site medical teams, medevac/helipad operations, multi-employer OSHA doctrine, serious injury/fatality reporting, and incident command optimization. The HR investigation reconstruction flags workplace safety / conduct / workplace-violence framework as a verified issue and references a CTS ER concern/alignment email to Corina and Kevin involving workplace safety and conduct concerns. The CTS Intern Program Tracker also includes safety-related onboarding controls such as crisis management plan review, SafetyNet or safety inspection shadowing, and shadowing the safety lead.

Primary question for counsel: Did Garrett engage in protected safety activity, did Turner know about it, did termination or other adverse action follow, and is there enough causal connection to file or preserve an OSHA Section 11(c) retaliation complaint before any short deadline expires?

New user-confirmed fact: Garrett states he was actively working on the safety / medical / critical-incident project, that an on-site medical professional was messaging him and working with him directly, and that she can corroborate his involvement. This should be treated as USER-REPORTED until counsel reviews the original messages with timestamps, sender identity, and full context.

Counsel should treat OSHA Section 11(c) / safety-retaliation as an urgent preservation lane, not as the primary theory unless counsel confirms the elements. The lane is time-sensitive because OSHA Section 11(c) complaints commonly carry a 30-day deadline from the adverse action. The issue must be reviewed immediately alongside the severance deadline.

0A. URGENT POST-TERMINATION DEVICE / iCLOUD DISCOVERY - FULL DISCLOSURE FOR COUNSEL

Why this section exists:

This is a separate high-risk issue that counsel must evaluate before any severance decision. It should not be hidden, minimized, or handled by Garrett directly with Turner. It may affect settlement leverage, remedies, release language, privacy/device-policy issues, and after-acquired-evidence arguments.

Known / user-reported facts to disclose to counsel:

- Rodney Pope verbally raised, and then referenced in writing, that inappropriate images were recently discovered on Garrett's company-issued device.
- Garrett states the content was synced from his personal iCloud to the company-issued device, not created or intentionally stored there as a Turner work file.
- Garrett states his personal iCloud was connected to the company-issued phone with IT/IS knowledge, permission, or instruction because personal/work data was mixed on the device.
- Garrett states he was not given an opportunity after termination to remove personal content, disconnect iCloud, or wipe personal data before Turner reviewed the device.
- Garrett states the content was never shown, posted, sent, threatened, distributed, or otherwise disclosed by him, and to his knowledge nobody saw it until Turner accessed/reviewed the phone after separation.
- Garrett states the content did not involve minors.
- Garrett states one image/content item involved a deepfake nude of a coworker. This is a serious fact and must be disclosed to counsel even if it was never distributed.
- Turner's written language says the images were "recently discovered," which may support a post-termination / after-acquired-evidence analysis if Turner did not know before the separation decision.

Counsel analysis needed immediately:

- Does the severance agreement release Garrett's claims while leaving Turner free to use, disclose, investigate, or escalate the device/iCloud issue?
- Can counsel negotiate broader finality: mutual release, neutral reference, non-disparagement, no further action, no additional internal dissemination, and no use of the device issue except as required by law?
- Should counsel request the discovery date, review scope, reviewer identities, chain of custody, policy basis, whether content was copied/forwarded/stored, and whether Turner notified anyone else?
- Should counsel characterize this as a separate post-termination device/privacy/iCloud issue, not the original termination basis?
- If Turner relies on it, does it operate as after-acquired evidence under McKennon-type analysis, potentially limiting remedies but not proving original motive?
- What privacy, device-policy, personal-cloud, and employee-device-access issues arise from a company review of personal iCloud-synced content after termination?
- What is the safest way to preserve evidence without deleting, altering, moving, or changing any iCloud/device content?

Recommended communication boundary:

Garrett should not discuss the image/content facts further with Turner by phone. If Turner intends to rely on the issue, counsel should ask Turner to put the allegation, timing, review scope, policy basis, and intended use in writing. Garrett should not contact the coworker, IT/IS, Thomas Milo, Google, Tandee Butler, or former coworkers about this issue without counsel approval.

Truthful counsel statement:

Garrett should tell counsel plainly: the content involved a coworker and was deeply sensitive; it synced from personal iCloud to a company-issued phone; it was never shown, sent, posted, threatened, or distributed; nobody saw it until Turner accessed the device post-termination; and Turner did not know about it when it made the original termination decision, to Garrett's knowledge. Counsel needs the full truth to evaluate severance, after-acquired evidence, and risk.

0B. URGENT OSHA / SAFETY-CRITICAL INCIDENT PRESERVATION ADDENDUM

1. Raw Situation Assessment

This is no longer a clean internal-resolution matter. Turner has formally stood by the termination, has broadened the rationale from "not doing work" to "lost confidence / collaboration / adherence to leadership direction," and has introduced a separate post-termination device/iCloud issue.

The original termination challenge is not dead. The evidence still supports a serious argument that Turner had notice of an operating breakdown, took intake, failed to conduct a facilitated reset, relied on local HR/project HR input, and then treated the unresolved issue as Garrett's performance failure.

The leverage is damaged by the device/iCloud issue. Even if it was never distributed and only synced from personal iCloud, Turner may argue policy violation or after-acquired evidence. That should be handled separately and carefully.

The practical recommendation is: do not sign the severance without attorney review. If counsel cannot review before the deadline, request a written extension/pause immediately. If Turner will not extend, counsel should advise whether to sign for finality or preserve claims and reject/counter.

2. Questions Counsel Must Answer Immediately

1. Does the severance agreement release all employment claims, unknown claims, EEOC/TWC claims, Texas Labor Code Chapter 21 claims, ADA claims, retaliation claims, OSHA/NLRB claims, defamation/reputation claims, and contract/assignment-memo claims?

2. Does signing the severance resolve, reserve, or leave open the separate phone/iCloud/device issue?

3. Should counsel request a severance deadline extension/pause in writing, without prejudice to rights or remedies?

4. Should counsel take over all Turner communications now?

5. Does Rodney's written "recently discovered" language make the device issue after-acquired evidence under McKennon rather than original termination motive?

6. Should an EEOC/TWC charge be prepared or preserved now? EEOC deadlines are not paused by internal review.

7. Is there a viable OSHA Section 11(c) lane tied to safety/critical incident reporting, and if so what is the deadline?

8. Should Thomas Milo / Google be preserved as a witness without contacting him directly?

9. Should counsel send a preservation letter covering HR files, Teams, Outlook, phone review logs, device chain-of-custody, iCloud sign-in/MDM policy, EthicsPoint, performance rationale, and all local HR review documents?

12. Should counsel treat the on-site medical professional and Thomas Milo as priority witnesses while instructing Garrett not to contact them directly?

11. Should counsel request preservation of SafetyNet, incident reports, medical-provider communications, Google/owner communications, emergency-response notes, and phone/message records tied to the safety incident?

10. Should counsel file or preserve an OSHA Section 11(c) complaint immediately given Garrett's safety/medical/critical-incident work and possible 30-day deadline?

3. Evidence Audit Scope and Integrity Limits

Automated local audit processed 1034 total file entries across uploaded Turner ZIPs and conversation uploads, deduplicated to 218 unique files, including 71 text-bearing unique files and approximately 1,658,052 extracted text characters.

Text-bearing formats parsed: DOCX, PDF, PPTX, XLSX, TXT, EML, JSON where supported. Images/HEIC files were inventoried but not OCR'd in this pass. They remain potential screenshot evidence requiring manual or image-specific review.

Google Drive connector searches/fetches surfaced CTS historical reconstruction, HR investigation reconstruction, HRDOS work-product evidence, intern experience materials, and intern onboarding evidence review. Drive search did not locate an actual severance agreement file under "severance" in the accessible query results.

Category	Count / Finding
Unique audited files	218
Text-bearing unique files	71
Extracted text characters	1,658,052
Unreviewed image-only assets	82
Top extensions	.docx: 83, .png: 58, .pdf: 20, .txt: 14, .jpeg: 10, .heic: 7, .zip: 7, .jpg: 6

4. Verified / Reported Core Facts

Fact	Summary	Label
Written Turner decision	Rodney email says decision will not be reversed; rationale: local leadership lost confidence in HR performance, collaboration, adherence to leadership direction; inappropriate images recently discovered on device.	VERIFIED-IMAGE / USER
Local HR basis	Rodney said review included information from local leadership and HR representatives who worked directly with Garrett and supported the project.	VERIFIED-IMAGE / USER
Original challenge	Garrett says stated rationale was not doing work / performance; he disputes as materially inaccurate.	USER + DRIVE WORK PRODUCT
Core process failure	Garrett says he escalated operating breakdown; Kevin took intake; no facilitated reset occurred with Corina + Garrett + neutral third party before separation.	USER-REPORTED; NEEDS SOURCE SUPPORT
Work product exists	Files support HR/onboarding/intern/recruiting/process/data workstreams.	VERIFIED-FILE / DRIVE
Device issue	Garrett states personal iCloud synced to company device with IT/IS knowledge/instruction; no showing/sending/posting/distribution/threat;	USER-REPORTED; URGENT COUNSEL REVIEW

	Turner saw only after post-termination review.	
Thomas Milo	Google-side representative allegedly saw Garrett regularly and met 30+ minutes with Garrett the day before termination re safety/critical incident.	USER-REPORTED; RESERVE WITNESS
Tandee Butler	Garrett reports Tandee independently submitting EthicsPoint and meeting Thomas about related project concerns.	USER-REPORTED; DO NOT COACH
Safety / OSHA preservation lane	Garrett reports active safety/medical/critical-incident work; on-site medical professional messaged/worked with him; Thomas Milo had Google-side safety visibility. Drive records show emergency-response and crisis-governance workstreams.	USER-REPORTED + DRIVE SUPPORT; ORIGINAL MESSAGES NEEDED

5. Condensed Timeline

Date	Event	Evidence status
Feb. 9, 2026	Garrett raised concern about shift from owning work to executing work being routed/framed/validated elsewhere; phrase: “I need to reset this.”	Reported / reconstruction; source email should be preserved
Feb. 17, 2026	Garrett gave Corina context to manage/coach him; “not an excuse” / “not a request for special treatment” / “coach me more precisely” / “If you see blind spots...”	Reported + reconstruction; source email and attachment needed
Apr. 20, 2026	Garrett escalated to Jeff Dolan with Kevin Ward copied: “growing misalignment” and accountability without upstream communication/decision-making/escalation.	Reported + reconstruction; source email needed
Apr. 21-25 approx.	Jeff out; Kevin responded; initial intake occurred; safety incident interrupted; follow-up about four days later; Kevin allegedly said difficult conversations may be needed with Garrett/Kevin/Corina.	Garrett note; calendar/notes needed
May 4, 2026	Garrett sent memo to Kevin before May 5 meeting; framed as request for partnership/reset, not discipline; said concerns raised for months without resolution.	Reported + reconstruction; source memo needed
May 11-13, 2026	Intern rollout/recruiting/onboarding workstreams active; files support intern program, onboarding, recruiting work.	Verified file/Drive support
Day before termination	Garrett says Thomas Milo met with him for 30+ minutes about safety/critical incident; owner-side visibility into project presence/work.	Garrett note; preserve witness
Termination / separation	Garrett says next major leadership meeting became separation; Jeff allegedly said support was giving Corina; later “Nobody raised their hand, brother” re relocation/reassignment.	Garrett note; source/witness needed
Jun. 2, 2026	Garrett emailed Peter Davoren and senior leadership requesting executive review before severance deadline.	Verified in email thread / pasted text
Jun. 3, 2026	Rodney Pope conducted intake; framed around closure/answers; said local HR handles hiring and could not guarantee employment; said he would review.	Garrett note
Jun. 4/5, 2026	Rodney wrote decision stands and added device/image issue as recently discovered.	Verified screenshot / user
Termination week / day before termination	Garrett reports 30+ minute Google-side safety/critical-incident discussion with Thomas Milo; reports on-site medical professional was messaging and directly working	User-reported; preserve messages, calendar entries, SafetyNet/incident records, and Google/medical communications.

	with him on safety/medical project.	

6. Names and Roles to Counsel

Name	Known role / relevance	Status
Garrett Baxley	Former HR-related employee on CTS Lonestar; claimant/client.	Self
Peter Davoren	Turner CEO/Chairman; routed escalation to Rodney.	Public + email thread
Rodney Pope	SVP Employee Relations; conducted review/intake; sent written decision.	Email thread
Abrar Sheriff	Turner senior executive copied on escalation.	Email thread
Patrick Blake	Chief Legal Officer copied on escalation.	Email thread
Aaron Wiebelhaus	Chief People Officer copied on escalation.	Email thread
Jeff Dolan	Senior HR leader / escalation recipient / separation meeting participant.	Garrett + records
Kevin Ward	Senior HR escalation; copied on April 20; took intake; separation meeting participant.	Garrett + records
Corina Murguia	HR leader/manager central to operating breakdown.	Records
Alex Willis	Collaborator/witness for large data/tracking workstreams.	Records + Garrett
Thomas Milo	Main Google representative; potential owner-side witness.	Garrett
Tandee Butler	Admin/project-side individual reportedly pursuing EthicsPoint and Google conversation independently.	Garrett
Jordyn Waters	Intern/onboarding execution workstreams.	Records
Joe Glowacki	Potential contradiction source regarding engagement/intern rollout.	Records/Garrett
Kitt DiLoreti	Recruiting/SPO workstream.	Records
On-site medical professional	Potential corroborating witness for safety/medical/critical-incident work and communications with Garrett.	User-reported; name/title/messages needed
Thomas Milo	Google representative / owner-side visibility into project presence and safety/critical incident discussion.	User-reported; counsel should preserve as witness, not contact directly yet

7. Evidence Matrix

Issue	Evidence	Counsel use
Notice / escalation	Feb. 9, Feb. 17, Apr. 20, May 4 communications; Kevin intake sequence.	Show Turner knew before termination; source originals needed.
No resolution	No facilitated reset with Garrett, Corina, neutral third party after Kevin intake.	Core process failure; needs calendar/notes support.
Work product	Onboarding controls, intern program deck/tracker, recruiting flyers, HRDOS/work-product docs, Alex data workstreams.	Rebuts “not doing work”; strong documentary category.
Shifting rationale	Original “not doing work” vs. written “lost confidence / collaboration / adherence to direction.”	Potential pretext / broadening defense language.
Local HR review	Rodney says decision based on local leadership / HR reps.	Shows review may rely on challenged chain.
Device/iCloud	Post-termination discovery of “inappropriate images” on company device; Garrett says personal iCloud sync and no distribution.	Separate high-risk issue; counsel only.
Owner-side visibility	Thomas Milo / Google saw project presence and safety incident involvement.	Reserve witness; do not contact without counsel.
Independent project concerns	Tandee EthicsPoint / Thomas meeting.	Potential corroboration; do not coordinate.
OSHA / safety-critical incident lane	Emergency-response operating-system file; HR crisis-governance report; CTS ER Concern/Alignment reference; medical professional messages; Thomas Milo safety discussion; SafetyNet/incident	Counsel should evaluate protected activity, employer knowledge, adverse action, causation, and Section 11(c) filing deadline.

	records.	

8. Key File/Drive Findings

CTS_Lonestar_HR_Investigation_Reconstruction identifies role-clarity breakdown, diminished practical authority, overlapping HR ownership, and downstream accountability landing on Garrett while workstreams moved around or parallel to him. It explicitly says available evidence does not by itself establish illegal retaliation/ADA/hostile environment, but does establish role clarity, team dynamics, professional conduct, HR operating model, and process ownership as live issues by late April/early May.

The HR investigation reconstruction identifies the strongest preserved evidence items as Garrett's May 4 concerns thread, May 4 proof note, April 30 DB Intake Discussion notes, CTS Intern Program Tracker, TY Onboarding SOP, Corina April 23 escalation-process email, May 5 CTS Intern Experience email, May 14 internship PowerPoint share, May 18 Haskell intern pay email, supervisor training invite, supervisor revision threads, and Alex Willis / Leadership Surge rollout emails.

The HRDOS work-product evidence record is useful only as work-product rebuttal. It supports that Garrett was doing planning/architecture/AI-operations work, but counsel should decide whether that work is within scope of Turner job duties or creates distraction risk.

The automated audit found no accessible severance agreement in the Drive query "severance." Counsel must review the actual agreement directly from Garrett's email/downloads before advising sign/reject/counter.

9. Legal Issue Map for Counsel

Issue	Counsel focus
Severance release	Urgent. Need actual agreement. Determine scope of release, unknown claims, EEOC/TWC carveouts, confidentiality, non-disparagement, no-rehire, cooperation, device issue, return of property, indemnity.
Retaliation / pretext	Core factual lane: notice + intake + no intervention + termination + work-product contradiction + shifted rationale.
ADA / accommodation	Do not over-lead. Available reconstruction says direct ADA/accommodation evidence not yet established in connector evidence; separate medical/context records may exist.
Texas Labor Code Ch. 21 / EEOC	Evaluate charge deadline and dual-file strategy. EEOC says filing deadlines generally are 180 days, extended to 300 days where state/local agency enforces similar law; internal dispute resolution generally does not extend deadlines.
OSHA §11(c) / safety	Urgent preservation lane. Counsel should evaluate Section 11(c) based on safety/critical-incident work, communications with on-site medical professional, CTS ER Concern/Alignment email, Google-side Thomas Milo safety discussion, and timing of termination. Do not ignore because 30-day deadline may apply.
After-acquired evidence	Device issue appears "recently discovered." Under McKennon, employer cannot claim termination was motivated by knowledge it did not have, but after-acquired wrongdoing can affect remedies if employer proves it would have terminated on that ground alone.
Device/privacy/iCloud	Separate issue. Need policy basis, MDM/iCloud instructions, discovery date, review scope, reviewers, chain of custody, whether content was copied/shared, whether coworker notified.
Defamation/reputation	Evaluate only if false performance rationale was shared beyond need-to-know or harmed future employment.
Joint employer / JV	Evaluate Turner/CTS/Clayco/TWC/Source/Google operational roles, but main employer appears Turner based on Rodney email.

10. Legal Reference Notes for Counsel

EEOC official guidance: A charge of discrimination is generally required before filing a job discrimination lawsuit under EEOC-enforced laws; EEOC says there are time limits for filing and the employer is notified when a charge is filed. Source: EEOC Filing a Charge of Discrimination, lines 215-218.

EEOC official guidance: Generally file within 180 calendar days; extended to 300 days if a state/local agency enforces a similar law. EEOC also states internal grievance/arbitration/mediation generally does not extend the filing deadline. Source: EEOC Time Limits, lines 213-219.

OSHA official guidance: Section 11(c) prohibits retaliation for complaining about unsafe/unhealthful conditions; filing deadlines vary 30-180 days; OSHA identifies four elements: protected activity, employer knowledge, adverse action, and protected activity motivating or contributing. Source: OSHA whistleblower form, lines 172-179 and 395-397.

McKennon v. Nashville Banner: employer could not have been motivated by knowledge it did not have; after-acquired wrongdoing is relevant to remedy; employer relying on after-acquired evidence must establish wrongdoing was severe enough that the employee would have been terminated on that ground alone. Source: Cornell/LII McKennon, lines 56-73.

11. Separate Device/iCloud Issue - Counsel-Only Analysis

Rodney's written email says inappropriate images were recently discovered on Garrett's company-issued device. Garrett states the content synced from personal iCloud onto the work device, the work device contained mixed personal/work content, IT/IS knew of or instructed/allowed personal iCloud use, Garrett was not given a chance to remove personal content before Turner reviewed the device, and the content was never shown, posted, sent, threatened, or distributed by Garrett.

This should be treated as a separate post-termination device/privacy/policy issue unless Turner can show it knew before termination. It should not be explained further to Turner verbally. Counsel should demand written specificity if Turner intends to rely on it: discovery date, reviewer identities, policy basis, scope, whether copied/shared internally, whether coworker notified, whether Turner preserved or deleted the content, and whether Turner claims after-acquired evidence.

Do not delete, alter, wipe, move, clean, or modify any phone, iCloud, photo, backup, message, device record, or evidence. Do not contact the coworker, Thomas, Google, Tandee, or IT/IS until counsel advises.

12. Recommended Immediate Action Plan

1. Send this packet, Rodney's written email, severance agreement, and post-call notes to counsel immediately.

2. If counsel is available: do not respond to Turner except through counsel.

3. If counsel is not available and deadline is imminent: send a narrow extension request only.

4. Prepare but do not send a preservation request covering: HR files, Outlook, Teams, SharePoint, Google Drive, device-review logs, iCloud/MDM records, security/IT instructions, EthicsPoint, local HR review files, and performance rationale communications.

5. Preserve evidence in native format; do not rename original files; create copies for review only.

6. Do not contact Google/Thomas or Tandee. Let counsel decide witness strategy.

7. Do not discuss device/image facts with Turner by phone again.

13. If Counsel Is Unreachable: Narrow Turner Email

Given the new issue raised in Rodney's email and the pending severance deadline, I need time to review the agreement and Turner's written position with counsel. Please confirm whether Turner will extend the severance response deadline.

14. Email to Counsel

Subject: URGENT - Severance deadline, Turner written decision, and device/iCloud issue

Counsel,

I need urgent review before my severance deadline expires.

Turner, through Rodney Pope, has now put its position in writing. Turner says it will not reverse the termination decision. Rodney states the review relied on local leadership and HR representatives who worked directly with me. Turner reframed the rationale as local leadership losing confidence in my ability to perform HR responsibilities, collaborate with HR team members, and adhere to leadership direction.

Rodney also wrote that inappropriate images were recently discovered on my company-issued device. My personal iCloud was connected to the device with IT/IS knowledge or instruction. The device contained mixed personal and work content. I was not given an opportunity to remove personal content before Turner reviewed it after separation. The content was not shown, posted, sent, threatened, or distributed by me, and to my knowledge nobody saw it until Turner accessed the device after termination.

I need advice on whether to sign, reject, counter, or request an extension of the severance agreement; whether the release covers or leaves open the device issue; whether Turner's device issue is after-acquired evidence; and whether counsel should take over communications immediately.

Attached/linked: Turner written decision, severance agreement, evidence packet, and audit index.

Garrett

Garrett

I have not contacted the medical professional, Thomas Milo, Google, Tandee Butler, IT/IS, or former coworkers for witness statements. Please advise whether and how to preserve those witnesses and records.

Please evaluate whether we need to file or preserve an OSHA Section 11(c) retaliation complaint before any short deadline expires, including whether my safety/critical-incident work, communications with on-site medical personnel, CTS ER Concern/Alignment materials, and Google-side safety discussion qualify as protected activity or evidence supporting protected activity.

Additional urgent fact for review: I was actively working on safety / medical / critical-incident issues on the CTS/Google data center project. The on-site medical professional was messaging me and working with me directly, and she can corroborate my involvement. I also had a 30+ minute Google-side discussion with Thomas Milo regarding the safety/critical incident the day before termination. My prior intake meeting with Kevin Ward was interrupted because I had to leave for a safety incident.

Counsel,

Subject: URGENT ADDENDUM - Possible OSHA 11(c) safety-retaliation preservation issue

Appendix D - Integrity Notes

This packet is not a substitute for counsel reviewing the actual severance agreement.

Screenshots and HEIC/image-only files were inventoried but not OCR-reviewed in this pass.

Facts marked user-reported should be supported with original emails, calendar entries, Teams messages, notes, or witness statements before filing or litigation use.

Do not provide this packet to Turner without counsel review. It contains strategy and sensitive device facts.

APPENDIX X. COMPLETENESS ADDENDUM FROM 060526 WORKING DOCUMENT

The uploaded 060526 working document materially upgrades the factual record. It is labeled as attorney work-product preparation and expressly separates claims by evidence certainty. It should be sent to counsel or used as a source map rather than as an external-facing document.

- The document reviewed Tier B work-product files and identifies the Emergency Response Operating System, Intern Experience deck, THM onboarding checklist, HR onboarding review, data-center public post work, HR-DOS work, HR crisis governance report, intern onboarding reviews, and SPO recruiting campaign.
- It confirms the Emergency Response Operating System as substantial research-grade work product on the reported termination date, addressing rural multi-employer construction emergency response, OSHA/FEMA/ICS concepts, third-arriver rule, and the project's Amphibious medic team.
- It confirms 24 images were reviewed, including May 11/13 intern emails, Joe Glowacki's text contradiction, Owner's Manual screenshot, May 14 holiday email, and Teams availability screenshot.
- It flags a major timeline correction: April 20 appears in the May 4 memo as Corina's phone relay regarding Joe/performance; April 22 is the verified written CTS ER Concern / Alignment escalation to Kevin and Jeff. This must be corrected before any final legal timeline.
- It creates a primary-source-only count of 11 dated requests for help, feedback, clarity, support, alignment, or accountability between Feb. 9 and May 14.
- It concludes no performance concern in the verified file appears as written, specific feedback with a defined standard, articulated path to correction, deadline, PIP, written warning, or meaningful chance to revise.
- It frames the Owner's Manual as a Feb. 17 communication-support / autism-context document that disclosed operational needs for explicit, consistent, direct communication and specific feedback, while cautioning that HRM Bootcamp pre-work status still needs primary confirmation.
- It flags unresolved items: exact termination date/attendees, April 9 prior-manager escalation ambiguity, HRM Bootcamp requirement, AC matter authorship, secondary identities, HRIS/badge corroboration, native email exports, termination letter, separation agreement, and final paystub.
