Week 2 2026 — Complete DFS Dossier

Contest: "Week 2 2026 Ray's in Aruba" · 15-game full-week GPP · Winner-take-all

Assembled: Sunday, 2026-09-20 (Central), from the full research corpus (Beexly/Sports `docs/research/2026-09-17/` through `2026-09-20/`). **Status: PROVISIONAL.** Nothing here is lobby-verified. Every salary is `[2P]` (second-party), every projection/ownership figure is scoped below, official inactives land ~11:30 AM CT Sunday, and weather must be refreshed before lock. Do not enter, publish, post, or send any lineup without explicit authorization.

---

§0 — How to read this dossier

Provenance tags (used everywhere): - `[2P]` — second-party salary (The Huddle "DFS Fantasy Domination: Week 2," published 2026-09-19; or DK Network Week 2 rankings/salaries, dated 2026-09-15). The DK endpoint was Akamai-blocked on 2026-09-19, so **no salary in this dossier is lobby-verified**. DK Network primetime (SNF/MNF/TNF-slate) salaries are second-party twice over — treat as placeholders. - `pOWN` — projected ownership. Public OWS/DKN ownership figures cover the **13-game Sunday main slate**, not Garrett's 15-game contest. They are directionally useful, not directly applicable. - `[FLAG]` — uncertain, disputed, stale, single-sourced, or internally contradictory. Every flag is explained in place. - All Week 1 statistics are **one-game samples (n=1)**. Scheme splits on sub-10-attempt samples are directional only. This is repeated per section because it governs every number in the file.

Percentile-flag conventions (they differ by source file — preserved as published): - The 101-player WR/TE pool file: `[ELITE]` = ≥90th percentile of the qualifying pool; `[WEAK]` = ≤25th percentile. Percentiles are within the 101-player pool, not league-wide. - The advanced-metrics file: `[ELITE]` = above 85th percentile (published rank or implied top-15%, e.g. 1st–4th of 32); `[WEAK]` = below 15th. † = derived flag (usage profile implies the band; directional, not verified).

Formulas used in this dossier: - Role-vs-salary value score (WR/TE pool): mean qualifying-pool percentile − salary percentile within the salaried pool. OUT/Doubtful players excluded. - Optimizer floor/ceiling: floor = 0.55 × projection; ceiling = 1.6 × projection (mechanical, not model-derived). - xFP = expected fantasy points (Sharp Football Analysis xFP tool). - TPRR = targets per route run. Route share = % of dropbacks with a route run. aDOT = average depth of target. YPRR = yards per route run. Air-yard share = share of team air yards. - PROE+ = Pass Rate Over Expectation × Pace (StatRankings proprietary). ARBY = Adjusted Run Blocking Yards/Carry. CoverageIQ = man/zone + 8-shell coverage metric (StatRankings proprietary). PROE (SumerSports) = pressure rate over expected. - DK fantasy points (standard): the scoring assumed throughout is the standard DK slate scoring used by every cited source. (The methodology file also contains non-NFL — e.g. NBA — definitions; those are non-actionable and were not reproduced.)

Team-assignment conflicts: the corpus contains 2026 roster assignments that contradict stale aggregators (Likely = NY Giant; Pittman = Steeler; Okonkwo = Washington; Gibson = Cleveland; Walker = Chief; Waddle = Bronco; Deebo = 49er; Kirk = 49er on IR; Evans = 49er per the pool file,

uncorroborated). Each is flagged in place. Where two corpus files disagree on a player's team, both are preserved and the conflict is named — nothing is silently resolved.

The non-invention rule: no salary, ownership, projection, injury, role, team, or status in this dossier is invented. Where the corpus doesn't surface a number it says so ("not publicly surfaced from allowed sources" / "not surfaced in extraction"). Gaps are listed in §10–§11.

---

§1 — Contest & Slate Overview

The contest. "Week 2 2026 Ray's in Aruba" — free, single-entry, 75 players, winner-take-all. Full-week **15-game** slate: 13 Sunday games + IND@KC (SNF) + NYG@LAR (MNF). Garrett's contest scope **overrides** public 13-game Sunday-main articles: any analysis written for the 13-game main slate (most OWS/DKN/FantasyPros content) is directionally useful but not directly mapped to this contest, especially ownership.

The 15 games (spreads/totals from the games-phase consensus, research date 2026-09-19; ranges reflect movement across sources):

#	Game	Spread	Total	Notes
1	MIN @ CHI (Sun 1:00 ET)	CHI -4.5	48.5–49.5	**Weather game** (rain, 13 mph, gusts 23–30)
2	CIN @ HOU (Sun 1:00 ET)	HOU -2.5	45.5–46.5	Collins OUT; ref Adrian Hill (under lean)
3	NO @ BAL (Sun 1:00 ET)	BAL -8.5	46.5–47.5	Flowers doubtful
4	WAS @ DAL (Sun 1:00 ET)	DAL -3.5 to -4.5	50.5–51.5	**Slate-high total**
5	NE @ PIT (Sun 1:00 ET)	NE -5.5	41.5–42.5	2nd-half rain risk
6	CLE @ TB (Sun 1:00 ET)	TB -7.5 to -8.5	41.5	PM t-storm/delay risk; ref Brad Rogers (high-flag, over lean)
7	PHI @ TEN (Sun 1:00 ET)	PHI -7 to -7.5	39.5	**Slate-low total**; 94–99°F heat
8	CAR @ ATL (Sun 1:00 ET)	CAR -2.5	43.5	Rush starts for ATL
9	JAX @ DEN (Sun 4:25 ET)	DEN -2.5	44.5–45.5	Strength-on-strength: JAX pass O vs DEN man/ pressure
10	LV @ LAC (Sun 4:05 ET)	LAC -6.5 (opened -9.5)	not surfaced in extraction	Sharp LV money; Bowers doubtful
11	SEA @ ARI (Sun)	SEA -3.5 to -4.5	40.5–41.5	Lock starts (Darnold OUT)
12	NYJ @ GB (Sun)	GB -3.5	44.5–45.5	Rain, gusts ~18 mph
13	MIA @ SF (Sun 4:25 ET)	SF -13.5	44.5–46.5	Ideal weather 72°F; ref Shawn Smith (over lean)
14	IND @ KC (SNF)	KC -6.5	46.5–48.5	Minor rain/wind risk
15	NYG @ LAR (MNF)	LAR -7.5	48–48.5	Dome; ref Brad Allen (under lean); MNF trends apply

Market strength tiers (@benbbaldwin objective ratings v3, 2026-09-19 7:51 AM CDT — "final"; blends near-term game lines with division/conference/SB/playoff/#1-seed futures via Kalshi; author: "a little skeptical about the Broncos being this good tho"): - True Contenders: SEA 65.6 (3rd), BAL 65.2 (5th), SF 64.2 (6th), PHI 62.2 (7th). - Above Average: DEN 60.5, CHI 60.0, NE 59.3, HOU 59.2, LAC 59.1, GB 56.8, JAX 56.7, DAL 56.5, CIN 55.7. - Below Average: MIN 49.0, TB 48.3, PIT 45.2, WAS 42.9, NO 41.0. - Bad: CAR 38.4, LV 35.9, ATL 33.4, NYJ 33.0, ARI 32.6. - Very Bad: TEN 26.0, MIA 25.6, CLE 20.1. - Off-slate for context: LAR 72.6 (1st), KC 65.5 (4th), NYG 46.9 (20th), IND 43.1 (22nd). - **Blowout-risk tier gaps on this slate:** BAL (65.2) vs NO (41.0); SF (64.2) vs MIA (25.6); TB (48.3) vs CLE (20.1); PHI (62.2) vs TEN (26.0). Underdog pass-volume fades apply to the bad-side QBs.

GSE-lab 2026 Week 1 EPA standouts (`team_metrics_2026.csv`, research 2026-09-17; role-check only): JAX 0.3998 EPA/play (0.7925/dropback), CHI 0.3598 (0.4827/db), NYJ 0.2713, SF 0.2624, BAL 0.2341; bottom: CLE -0.492 (-0.643/db), PIT -0.311, TEN -0.264, DEN -0.260. **2025 full-season priors** (same file; EPA/play | EPA/db | EPA/rush | def EPA/play | pts/drive): CHI 0.0953|0.1234|0.0545|-0.014|2.672; DAL 0.1353|0.2090|0.0183|-0.179|3.078; JAX 0.0492|0.0785|0.0011|0.0913|2.890; SF 0.1077|0.1943|-0.018|-0.081|2.972; NE 0.1856|0.3328|-0.049|0.0470|3.245; GB 0.1395|0.2880|-0.055|-0.050|2.715; HOU -0.021|0.0474|-0.126|0.1104|2.308; TB 0.0056|0.0527|-0.064|-0.031|2.289; CLE -0.173|-0.224|-0.096|0.0753|1.641; BAL 0.0569|0.0582|0.0554|-0.053|2.807; PHI 0.0160|0.0358|-0.013|0.0955|2.339; SEA 0.0613|0.1323|-0.026|0.1117|3.037; LV -0.228|-0.220|-0.242|-0.039|1.575; TEN -0.181|-0.194|-0.160|-0.140|1.808; NO -0.079|-0.039|-0.142|0.0255|1.974; CAR -0.071|-0.086|-0.051|-0.076|2.101; NYJ -0.171|-0.205|-0.129|-0.166|1.935; PIT 0.0422|0.0373|0.0496|-0.007|2.611; MIN -0.109|-0.147|-0.052|0.0949|2.205; WAS -0.002|0.0270|-0.044|-0.148|2.561; MIA -0.020|-0.018|-0.023|-0.087|2.409; ARI -0.027|0.0190|-0.129|-0.078|2.290; CIN -0.001|-0.039|0.0714|-0.139|2.653; DEN 0.0468|0.1046|-0.052|0.0798|2.401. (Note: the defense-scheme lane (9/19) reports slightly different 2026 Wk1 offensive EPA/play figures — e.g. NYG +0.397 EPA/play, +0.677/db — from its own cut; both are preserved with attribution rather than reconciled.)

Scope caution, stated once and applied everywhere: public 13-game-main-slate content (OWS projections/ownership, most FantasyPros/DKN ranks, the 9/18 evening-sweep tables) excludes SNF/MNF pieces (Taylor, Walker, Rice, Worthy, Kelce, Nabers, Puka, Adams, Kyren, Dart, Likely, Skattebo). In Garrett's contest those players are live and largely absent from public ownership data.

---

§2 — Final Lineups

L1 — PROVISIONAL ($49,400) ✓ cap-valid on [2P] salaries

Pos	Player	Team	Salary	Salary provenance	Role thesis (one line)
QB	C.J. Stroud	HOU	$5,500 [2P]	Huddle 9/19	Highest accurate-throw rate; clean-pocket 20/27, 226, 2 TD, 0.45 EPA/db; Collins OUT consolidates
RB	Derrick Henry	BAL	$7,200 [2P]	DK Network 9/15	24-144-3; tied-1st rush TDs; 82.0 PFF grade; $1,000+ below Bijan/Taylor
RB	D'Andre Swift	CHI	$6,300 [2P]	—	Weather-game checkdown/rushing premium; MIN blitz 80.4% but solved in-game
WR	Jaxon Smith-Njigba	SEA	$8,100 [2P]	B/raw lane (Minis extract)	96% routes, 45.8% share, 42.3% TPRR — slate's most concentrated WR role; now with Lock

Pos	Player	Team	Salary	Salary provenance	Role thesis (one line)
WR	DK Metcalf	PIT	$5,200 [2P]	—	204 air yards (2nd); Pittman trending out funnels targets; 10-tgt role
WR	Xavier Hutchinson	HOU	$3,500 [2P]	—	Legit WR3 usage (69% routes, 21% TPRR); preferred over Noel/Boutte in Stroud stack
TE	Dalton Schultz	HOU	$3,200 [2P]	—	ELITE spot: 8 Wk1 tgts vs CIN LBs (PFF-worst coverage, 34.4 team grade); ~5.5% pOWN
FLEX	Christian McCaffrey	SF	$8,000 [2P]	—	90% zone scheme vs MIA 65.2 zone yds allowed — strongest true-lead-back preferred-scheme edge
DST	Jacksonville	JAX	$2,400 [2P]	—	53.1% pressure + 16.7% sack% vs DEN 56.3% pressure allowed — best pressure mismatch on slate

Total: $49,400 (5,500+7,200+6,300+8,100+5,200+3,500+3,200+8,000+2,400). Cap-valid **only** on unverified [2P] salaries. **Data flags on L1:** (1) JSN's $8,100 comes from the B/raw salary lane (Minis extract, cleaned 9/19) — The Huddle salary map (9/19) does **not** price JSN, and C2's allowed sources did not surface his salary; provenance is weaker than the rest. (2) Every other salary is [2P] and lobby-unverified. (3) L1 was human-constructed on top of the optimizer outputs (§6), not solver-generated as a unit. (4) Swift carries the MIN rush-defense concern (Minnesota rush defense graded 100th percentile in the GSE-lab cut; weather game) — retained for checkdown/rushing premium in rain.

L2 — as constructed: INVALID ($51,000, over cap)

Pos	Player	Salary [2P]
QB Geno Smith (NYJ)	$4,800	RB D'Andre Swift $6,300
WR Malik Nabers (NYG) $6,500	WR Christian Watson (GB) $6,200	WR Jalen Coker (CAR) $5,100
TE Mark Andrews (BAL) $4,400	FLEX Bijan Robinson (ATL) $8,200	DST Tampa Bay $3,600

Total: $51,000 — $1,000 over the cap. The original sheet wrote TB DST at $2,600; the corpus prices Tampa Bay DST at **$3,600** (Huddle 9/19; The Huddle's own recommended lineup), so the build is invalid as written. Additional flags: Nabers ($6,500) and Coker ($5,100) sit **outside the 18-WR optimizer pool** — L2 was not solver-generated. Skattebo's $5,900 is a DK Network 9/15 primetime number (labeled "TNF-salary" in the source artifact; NYG actually plays MNF — source-labeling artifact, verify in lobby).

L2b — suggested mechanical fix (NOT Garrett-approved; rebuild after salary verification)

Swap Jalen Coker ($5,100) → Xavier Hutchinson ($3,500): **$49,400**, cap-valid on [2P]. Hutchinson is in both optimizer lineups and carries the Collins-OUT consolidation thesis. Alternative: TB DST ($3,600) → JAX DST ($2,400) = **$49,800**, keeping Coker. Either fix is mechanical; neither is authorized — both need lobby-verified salaries and the 11:30 AM CT inactives before they mean anything.

Lineup construction rules applied: no lineup is entered, published, posted, or sent without Garrett's explicit authorization (standing rule). L1/L2b remain provisional until the gates in §10 clear.

---

§3 — Game-by-Game Coverage (all 15)

Each game: line/total (9/19 research), weather, referee (where surfaced), GSE-lab/scheme verdicts, players with corpus-grounded stances, and flagged contradictions. Team-affiliation conflicts are flagged per §0.

Game 1 — MIN @ CHI (Sun 1:00 ET) — CHI -4.5, total 48.5–49.5

Weather — the slate's main concern: rain, sustained wind ~13 mph with gusts 23–30 mph, ~69°F, 3-of-5 impact rating. Downgrade deep passing, Caleb Williams' air attack, Jefferson's deep equity, Swift's receiving line, and kicking. Checkdown and rushing volume get a premium. Refresh Sunday morning. **MIN offense (Carson Wentz starts; J.J. McCarthy in concussion protocol — Adam Schefter reporting):** Justin Jefferson is the case, not the offense (ELITE: 97% routes, 39.1% target share, 31% TPRR, 3.17 YPRR, xFP 22.1 #5 vs actual 29.2 — positive TD regression; CHI plays the league's 2nd-highest man rate, 60–65.2%, with Johnson (113.7 rating allowed) and Stevenson (158.3) vulnerable in man — the coverage matchup is genuinely good). Jalen Nailor: 87% routes, 0 catches — buy-low volume flag; only 8% TPRR but CHI's slot coverage allows 0.60 FP/rr (24th-worst). Jordan Addison (PFF 12.5/12.5/6.2 splits vs Johnson/Stevenson/Muhammad; CHI allows 60% target rate into slot). Aaron Jones: 43% snaps with Mason on IR (placed 9/16) — needs route data before trusting volume; CHI allowed 0.380 EPA/play rushing (worst in sample). T.J. Hockenson caught 4-36-1 but Josh Oliver's 76.5 PFF grade threatens snaps (Fade). **MIN defense (DC Brian Flores):** 80.4% blitz rate (cut 83%→63% in-game vs DET — they adjusted; the scheme is adjustable, not fixed), pressure graded 96.8th percentile in GSE-lab, but only 16.1% pressure allowed by CHI's line in the lab's other cut — the pressure battle is the game's fulcrum. 62.7% six-up rate (1st). **CHI offense:** Caleb Williams is the composite QB #1 (94.8 QBR, 0.55 EPA/play, 80.8% adjusted completion, 10.7 aDOT, 37.3 DK points — slate #1 — 1.20 FP/dropback, 120.6 rating under pressure, 7 scrambles/game) — the weather is the only brake. HC Ben Johnson's "highest-scoring offense ever" quote verified via ESPN/The Athletic, 2026-08-12; Chicago scored 59 in Week 1; Chicago's implied total was 27.0 (RotoWire, 9/18). The positive Minnesota case is Jefferson's role, not the offense overall. **CHI scheme risks for Swift:** Minnesota's rush defense graded 100th percentile in the GSE-lab cut — the single biggest Swift concern in the corpus; retained in L1 for weather-game checkdown/rushing premium, not scheme. **TE lane:** Colston Loveland (82% routes, 1 target, 3% TPRR — the profile is a Fade; note the ThunderDanDFS coverage model gives him +0.14 projected YPRR, a genuine counterpoint that doesn't fix the usage); Luther Burden (24 routes, 0.083 separation, 2.63 YPRR, 17.2% target share — rotational). Rome Odunze: +0.16 coverage-model upgrade (ThunderDanDFS, 9/20). **Value standout:** Kalif Raymond — 56% routes, 36% target share, 41% TPRR, 3.82 YPRR, top-5 mechanical value. **Corpus specifics:** CHI generated 27.9% pressure / allowed 44.7%; CHI missed tackles 12.5% (22nd); CHI defensive pressure forced 12.9th percentile (GSE-lab).

Game 2 — CIN @ HOU (Sun 1:00 ET) — HOU -2.5, total 45.5–46.5

Referee: Adrian Hill — the strongest under lean of the four crews with extracted data (RotoWire). **HOU offense:** C.J. Stroud (highest accurate-throw rate in the composite; clean-pocket line 20/27, 226, 2 TD, 0.45 EPA/dropback; composite QB rank #13) — but **Nico Collins is OUT (hamstring, G1)**. Dalton Schultz is the ELITE spot of the slate's TE tier: 8 Wk1 targets, 21.6% share, 27% TPRR at $3,200 [2P] with ~5.5% pOWN, against CIN LBs graded the PFF-worst coverage unit in the league (34.4 team grade, starters sub-41, 115.3+ ratings allowed). **Hutchinson > Noel/Boutte** in the Stroud stack: Hutchinson

69% routes, 16.2% share, 21% TPRR, 8.7 aDOT; Boutte 60% routes/8% TPRR; Noel 33% routes part-time. Mike Gesicki is a top-5 mechanical value (46% routes, elite per-route efficiency, $3,600 [2P]). **CIN offense:** Joe Burrow is Q (back) but expected to play — full Friday practice, "not 100%" per beat reporting; CIN@HOU stacks live with a ceiling discount. Ja'Marr Chase $7,600 [2P] is a mechanical trap (RotoWire's line: 2-12-0 on 4 targets — source line as published 9/19; note the 9/18 tables also contain Wk1 stat noise, verify game log) — with a genuine counterpoint: the ThunderDanDFS coverage model (9/20) gives Chase +0.29 projected YPRR vs HOU's coverage splits. Trap flag and counterpoint both stand; price and ownership decide. Tee Higgins un-graded in extraction — gap. Chase Brown: 69% gap-scheme into HOU's 24.8-rated gap defense — scheme downgrade. **Scheme:** CIN pass defense grades 87.1th percentile but their pressure forced only 12.9 — the "good coverage, no rush" profile; lean-bad for CIN overall vs HOU's 2025 elite defensive baseline. HOU defense (DC Matt Burke, promoted; man-heavy): 0.69 perimeter FP/rr (worst in NFL), 2.44 YPRR (3rd-worst), 25.0% explosive reception rate (tied 3rd-worst), +4.27 INT luck (negative regression due). **ThunderDanDFS coverage-model upgrades:** Schultz +0.12, Hutchinson +0.10. **GSE-lab:** CIN pass D 87.1 percentile noted above; HOU implied as the slate's most trustworthy home defense.

Game 3 — NO @ BAL (Sun 1:00 ET) — BAL -8.5, total 46.5–47.5

Injuries: Zay Flowers DOUBTFUL, not expected to play (baltimoreravens.com; Ravens Wire/Jeff Zrebiec, 2026-09-18). Alvin Kamara debuts behind Etienne per Saints reporting 9/18–19 (role to confirm). **BAL offense:** Derrick Henry is ELITE ($7,200 [2P], RB5): 24-144-3, 55% snaps, tied-1st rush TDs, 104 YAC, 4.33 YAC/att, 82.0 PFF grade, 70.6% carry share, inside-10 5/15/2 (83.3%), inside-5 6/27/2 (85.7%), career 0.82 rush TDs/game. Mark Andrews is a PLAY ($4,400 [2P]): tied team lead with 6 targets (25.0% share, ~29% TPRR), 68% routes, 70–72% snaps, +1.7 receiving EPA, 79%/64%/75% personnel splits — with Flowers out the target tree condenses and there is no in-room receiving competition; DK Network's TE22/7.8-projection ranking was published 9/17, before the doubtful designation. Risks: −8.5 run script, 20% drop rate (flag — drop figure is brief-cited, single-source). Rashod Bateman is CONDITIONAL: 4% TPRR on 84% routes, 0 catches — WR1 by default with Flowers out, but the profile is terrible and the Saints were a top-4 pass defense in 2025 (72.8 Wk1 coverage grade, 3rd-best man rating 85.4, 1.5 man YPA). **NO offense:** Tyler Shough (325+ in the 2H/OT vs DET; full line 61 dropbacks, 410 yds, 3 TD, −0.017 EPA/db). Juwan Johnson (50 routes, 45 move-TE snaps, 32 slot snaps, RZ TD, 4.8 FP/touch, tied atop TEs in inside-10 targets at 2/100%, $3.9k). Noah Fant (NO): 8 targets, 15% share, −1.066 EPA/target — fade on efficiency. **The core thesis:** New Orleans likely cannot keep up through the air — BAL pass defense 96.8th percentile vs NO pass offense 38.7 (GSE-lab). That same 96.8 is the primary counterargument to any Olave/NO pass-game piece (the optimizer's leverage lineup used Olave — human override: out). **Scheme tells:** Justice Hill ran 83% zone vs a NO defense that grades 79.0 vs zone — the Henry tell (NO can't defend zone). **Tempo/motion:** NO plays slow (10.9 sec/play, 29th) with heavy motion (58.1%).

Game 4 — WAS @ DAL (Sun 1:00 ET) — DAL -3.5 to -4.5, total 50.5–51.5 (slate high)

WAS offense: Jayden Daniels (pressure rate contested: PFR 18.4% vs PFF 42% — both preserved, unresolved) — rushing floor, OL graded C vs a DAL edge rotation missing Hooker (IR, forearm, out) and Overshown (hammy, out, green dot). Terry McLaurin is the slate's defining contradiction: poor Wk1 (13.8% target share, 11% TPRR, 0.40 YPRR, 5.3 aDOT) vs Bland — but the ThunderDanDFS coverage model gives the **largest upgrade of any WR/TE: +0.56 projected YPRR**. Trap warning and genuine counterpoint both stand; do not resolve — price and ownership decide. Zach Ertz-era note: Chig

Okonkwo is **Washington's** TE and is OUT (hamstring) — 58% routes, 14% TPRR vacated. Deebo Samuel is NOT on Washington in 2026 (departed; on SF per corpus). Jeremy Croskey-Merritt: 52% XFP share. **DAL offense:** Dak Prescott (22/34, 175, 2 TD, 1 INT, 0 sacks; +0.59 EPA/db clean vs −0.52 pressured; 29.4% pressure faced). CeeDee Lamb is the slot funnel (47 slot snaps, 8 targets, 62% success, RZ TD — WAS allowed a 35.1% slot target rate, 8/13 in Wk1). George Pickens is the bounce-back (3/6, 28, 2 drops; Karabell predicts a TD; +0.17 coverage-model upgrade — ThunderDanDFS, 9/20). CeeDee Lamb also gets +0.15. Jake Ferguson ($3,800 [2P]) is the cheap Dallas-side piece — weak Wk1 usage (75% routes, 7% TPRR) but Luvu is out and this is the slate's highest total. **Javonte Williams is STRONG SUPPORT** ($6,400 [2P], RB8): 95% XFP share (tied #1 with Achane), 85% RB opportunity share, 66.7% rush share, 58.3% rush success, inside-10 3/2/1 (100% rush share), RZ receiving 2/2/12/1 — vs a WAS defense that allowed the most DK ppg to RBs in 2025 (32nd). WAS blitzes 44.1% (5th) but Javonte's receiving role is blitz-proof; the crack in the profile is a 7.7% late-down share. **Scheme:** WAS defense is zone-heavy (82.1%, 5th) with 44.1% pressure (5th) and +14.0 PROE (5th) under DC Daronte Jones (Flores-derived scheme, not Quinn's) — NEUTRAL for DAL. DAL defense: +0.397 EPA/play allowed, 62.1% success (WAS offense GOOD), man rate jumped to 45.2% (5th) from 24.0% in 2025, −4.62 INT luck (positive regression due). DAL: 65.4% motion, 21.6% pressure generated. Cost of drops: DAL 8.3 (2nd, 3 drops). WAS pace is mildly supportive (22.7 sec/play). **GSE-lab:** Dallas pass defense 3.2nd percentile — the single worst unit grade in the lab's one-game cut; WAS pass offense has the best opponent-adjusted spot on the slate.

Game 5 — NE @ PIT (Sun 1:00 ET) — NE -5.5, total 41.5–42.5

Weather: rain increasingly likely in the 2nd half (StormTeam 5 via Patriots Wire, 9/18). **PIT offense:** Aaron Rodgers; DK Metcalf (4/10, 40 yds, team-high targets, one drop — 204 air yards, 2nd on slate; $5,200 funnel read with Pittman trending out; **+0.37 coverage-model upgrade, 2nd-largest on the slate** — ThunderDanDFS, 9/20); Michael Pittman is **Pittsburgh's** WR and is Q (foot, DNP Thu/Fri — trending OUT); Roman Wilson (3/26 on 6); Pat Freiermuth GOOD if Pittman sits (5/46/1; +0.15 coverage-model upgrade — ThunderDanDFS, 9/20, though that table's Freiermuth row carries a team/opponent anomaly and is flagged in §11.6). T.J. Watt: 2 sacks + a 35-yard pick-six off Rush. Jaylen Warren: 63% XFP share. Kenneth Gainwell gets a gap-scheme upgrade (soft spot vs CLE noted in the RB table — cross-game scheme note, apply carefully). **PIT defense — reputation inverted:** 96.2% zone (1st) vs 64.0% in 2025, league-low 10.5% blitz — this is a 4-man-rush + disguise-zone unit now (4 sacks + 2 INTs in Wk1), NOT the man-blitz defense of reputation. Zone rating 75.3 (1st); the crack is a 25.0% explosive reception rate (tied 3rd-worst); +3.23 INT luck (negative regression due). **NE offense:** Drake Maye (lost 13-10 vs SEA); Carlton Davis (neck) DNP all three practices — Q, and if out, M. Jones + Woods expand; Demario Douglas (79% routes, 22.6% share, 0.61 YPRR); Hunter Henry (62% routes, 9.7% share). **NE defense:** blitz rate 48.1% (3rd) vs 29.8% in 2025 — a schematic shift under DC Kuhr; 0.58 perimeter FP/rr (3rd-best); 2025 full-season: 4th in points, Super Bowl LX berth. Rhamondre Stevenson: 74% XFP share — but Henderson practiced 9/14 and threatens the role. **GSE-lab verdict:** PIT offense vs NE is the **worst offensive matchup of the slate** (PIT −0.311 EPA/play vs a Super Bowl-caliber unit). **Corpus conflict:** the pool file places Romeo Doubs on NE ($5,000 [2P]); other lanes treat him as GB — preserved as-source, do not use without resolving. (Stefon Diggs' team assignment: the ThunderDanDFS table (9/20) lists his opponent as DAL, placing Diggs on **WAS** — adopted here; other corpus lanes conflict, so the flag stays on the record.)

Game 6 — CLE @ TB (Sun 1:00 ET) — TB -7.5 to -8.5, total 41.5

Weather: heat/humidity with PM thunderstorm/delay risk — monitor; a delay scrambles inactives timing and in-game roles. **Referee:** Brad Rogers — high-flag crew, 58-50 career over. **CLE offense — avoid:** Joe Watson is BAD (5 sacks, 2 turnovers, 272 net yards, 1 third-down conversion; PFF 40.1 — lowest of 30 qualifying QBs; 3 turnover-worthy plays vs 1 big-time throw; 16.7% sack rate; benching risk) vs TB's 4th-ranked blitz. Quinshon Judkins: 61% XFP share but 2.8 YPC — bad/neutral. Antonio Gibson is on **Cleveland** (corpus). Dylan Sampson to IR (knee). Harold Fannin Jr.: 69% routes, 13.6% share — garbage-time TE profile ($4,100). Jerry Jeudy: **unresolved** — DEN/$5,100 vs CLE/$3,900 attributions conflict across files; do not use. **CLE defense:** +0.400 EPA/play allowed (worst), 61.2% success, 1.48 slot FP/rr (worst in NFL), 2.50 YPRR (2nd-worst), 22.2% explosive reception rate (5th-worst); 1st-time DC Rutenberg — GOOD for TB, the strongest offensive matchup grade on the slate. **TB offense:** Baker Mayfield GOOD ($5,600 [2P]; revenge spot; 82.1% completion led the NFL in Wk1, +15.4 CPOE 2nd of 30; rushing-TD floor). Bucky Irving: 80% XFP share with an elite interior-matchup package (LG 37%/RG 25% zone, interior 62.5% vs CLE's soft 31/32 interior grades; 3.88 YAC, 0.63 evaded tackles/att, 62.5% success). Emeka Egbuka GOOD (0.069 separation, 2.17 YPRR). Chris Godwin is a mechanical TRAP (69th/72 in separation, 1.33 YPRR, $5,600 [2P]). **TB defense:** 45.9% blitz (4th); BAD for CLE — among the slate's worst offensive matchups; TB DST $3,600 [2P] (The Huddle's own recommended lineup; note §2's L2 salary correction). **Trench data:** CLE missed tackles 20.8% (31st), TB 15.2% (25th).

Game 7 — PHI @ TEN (Sun 1:00 ET) — PHI -7 to -7.5, total 39.5 (slate low)

Heat: 94–99°F. Rushing QBs are less heat-sensitive — a mild contrarian OVER input on a 39.5 total; slow pace is the headwind (TEN 14.0 sec/play, 32nd). **PHI offense:** Jalen Hurts (rushing floor ~2.0 EPA/game, ~0.685 TDs/game — the only QB in the elite rushing quadrant). Saquon Barkley: 75% XFP share. Dallas Goedert ($4,800): 4-77-2, 64% routes, 22.7% share, 3.67 YPRR — ELITE per-route; +0.15 coverage-model upgrade (ThunderDanDFS, 9/20). DeVonta Smith: +0.25 coverage-model upgrade. Makai Lemon (debut): 29 routes, −5 yards, −0.17 YPRR, negative aDOT — trap-vs-opportunity only if minimum-priced. **PHI defense:** +19.0 PROE (2nd), 45.0% pressure (tied 3rd), 4.2 zone YPA (2nd), 86.1 man rating (4th) — BAD for TEN. **TEN offense — avoid:** Cam Ward (34.3 QBR; 56.2% on 0–5 air yards, 48.7% complete, 7.7% sacks). Calvin Ridley: 59% routes, **0 targets**. Carnell Tate: 85% routes, 21.4% share, $5,100. Elic Ayomanor: 0.111 separation (1st among 2nd-year WRs — the one bright route metric). Gunnar Helm: 54% routes, 17.9% share, 24% TPRR, $3,100. Tony Pollard: 86% gap-scheme into PHI's 25.8-graded gap defense — scheme downgrade. Tyjae Spears: 55% XFP share. **TEN defense:** +0.271 EPA/play allowed, 56.0% success, −4.99 INT luck (positive regression due); DC Bradley but HC Saleh calls plays (wide-9, single-high) — execution lagging; LEAN-GOOD for PHI. **GSE-lab:** TEN offense −0.264 EPA/play; TEN missed tackles 17.3% (30th).

Game 8 — CAR @ ATL (Sun 1:00 ET) — CAR -2.5, total 43.5

ATL offense — the Rush problem: Cooper Rush starts his 2nd straight: 12/22, 143, 1 TD, 2 INT, 4 sacks; 2.6 QBR (worst), −21.3 CPOE (worst), 80% pressure-to-sack (worst), 3.5 air yards/att — unplayable, and he buries the ATL pass game (Drake London downgraded — USA Today: "London can be a WR2"; London's 2025-26 line 2.52 YPRR/0.30 TPRR; the coverage model gives London a mild +0.16 projected-YPRR counterpoint — ThunderDanDFS, 9/20 — which doesn't survive the QB); Kyle Pitts faded — 81% routes, 1 target; USA Today: "could be replaced"). **Bijan Robinson is the entire offense** ($8,200 [2P], RB2, 23.5 projection): 77% snaps, 21-83 rushing, 10 targets/8-90-1 receiving, 52.6%

target share, 48% TPRR, 4.29 YPRR — mega-chalk, and the role justifies it. **CAR offense:** Bryce Young GOOD (23/38, 361, 3 TD, 1 INT; +0.43 EPA/play in 12 personnel; better pressured (+0.29) than clean (+0.11); 4th in YPA; deep-GPP case: 111.9 rating under pressure (2nd), 0.81 FP/dropback; dome). Jalen Coker GOOD ($5,100): 74% routes, 26.5% share, 4.31 YPRR, 124 air yards (5th), +0.16 coverage upgrade, no injury designation; ATL slot CB Bowman is OUT. Tetairoa McMillan: 84% routes, 23.5% share, $6,100 (Q, knee — full practice, game-time decision). Xavier Legette: 56% routes, 2 targets. Chuba Hubbard: 80% zone-scheme into ATL's 33.1-graded zone defense — downgrade. **Defenses:** CAR — +0.360 EPA/play allowed (worst efficiency), 55.6% success, 45.0% pressure (tied 3rd), +4.05 INT luck (negative regression due); 2025: 27th points, 32nd yards, 32nd EPA — GOOD for ATL offense (softest profile on slate), but Rush is unplayable so only the ATL run script (Bijan) benefits. ATL — −0.311 EPA/play allowed, 32.2% success, franchise-record 57 sacks in 2025 — BAD for CAR. **Tempo:** CAR plays at 12.0 sec/play (31st) — supports the under on a 43.5 total with Rush.

Game 9 — JAX @ DEN (Sun 4:25 ET) — DEN -2.5, total 44.5–45.5

The slate's defining game-theory fork: Trevor Lawrence's efficiency crown vs DEN's man/pressure defense; the JAX pass offense (100th percentile, GSE-lab) vs DEN pass defense is strength-on-strength — NEUTRAL graded, decided by game script. **JAX offense:** Lawrence (18/23, 245, 4 TD; +0.82 EPA/pass; success 1st/32, YPA 3rd, catchable 4th; +1.35 EPA/play without play-action; depth buckets — behind LOS 4/100%/5.18 sep/1.74 TTT; short 7/57.1%/2.60/2.86; intermediate 9/88.9%/2.94/3.16; deep 3/66.7%/2.13/4.43; 2.95 TTT, ≈+17 CPOE) vs DEN's 58.6% man (3rd) + 20.4 PROE (1st). Parker Washington is NEUTRAL-leaning-good as the true WR1 (6 targets, 5/83/1, 72% routes; DiRocco: "favorite target"; 5.5 YPRR, 7.2 vs man, 5.8 FP/target vs man, 1.58 slot FP/route) — but DEN was top-8 vs WRs in 2025, Surtain erases one side (65.4 PFF, targeted once; shadow role UNVERIFIED), and McMillian (104.2 rating allowed) is the soft spot to target, not Surtain. Brian Thomas Jr.: bad/neutral (shoulder; 3/40; 52% routes is an injury artifact; possible Surtain draw). Bhayshul Tuten: the best raw zone/gap matchup on the slate (balanced vs DEN's 71.1/86.3 zone/gap grades — worst combined) with an uncertain role (65% XFP share) — GPP-only. Jakobi Meyers (post-trade): 20 routes, 76% routes, 9.5% share. Travis Hunter plays corner full-time (offensive role minimal). **JAX defense — the DST case:** −0.493 EPA/play allowed, 53.1% pressure generated (2nd) vs DEN's 56.3% allowed, 16.7% sack rate (1st) vs 4.5% — BAD for DEN, among the slate's worst offensive matchups; JAX DST $2,400 [2P] (in L1/L2b): the pressure mismatch is the best on the slate, but +5.04 takeaway luck in 2025 warns against projecting repeat turnovers — pressure, not INTs, is the thesis. **DEN offense — fade:** Bo Nix (PFF 33.4, 4 sacks, 3 fumbles, 1 INT; bottom-3 EPA/db, YPA, aDOT; composite QB #31; faced 54.5% pressure). Jaylen Waddle is now a **Bronco** and a $6,500 mechanical trap (1 catch for 2 yards on 3 targets with a drop). Evan Engram $3,300 (4/43/1, 58% routes, 18.5% share). Pat Bryant: 19 routes, −0.053 separation. RJ Harvey: 74.3 — DEN's best-graded offensive player — but Q (hamstring), confirm. **DEN defense:** 58.6% man (3rd), 45.5% blitz (5th), +20.4 PROE (1st), 78.1 zone rating (2nd); 2025 elite pressure differential (21.5% forced / 10.2% allowed) — NEUTRAL for JAX (strength-on-strength). **Trench:** DEN missed tackles 26.1% (32nd, worst in NFL). DEN: 25.7% six-up (2nd), 39.1% motion. **GSE-lab:** JAX pass D 100th percentile vs DEN pass O 9.7; DEN rush D 0.0 percentile.

Game 10 — LV @ LAC (Sun 4:05 ET) — LAC -6.5 (opened -9.5; sharp LV money), total not surfaced in extraction

LV offense: Kirk Cousins starts (3 TD, 2 brutal INTs, little pressure — neutral); LV pass O 67.7 / rush O 87.1 (GSE-lab) vs LAC pass D 16.1. Brock Bowers is DOUBTFUL (knee; meniscus trim 9/8 — confirm

pregame). **Michael Mayer is ELITE if Bowers sits** ($3,600 [2P]): 74% routes, 24.1% share, 30% TPRR vs LAC's 27th-ranked DVOA vs TEs, 77% TE catch rate allowed, LBs graded ~42–43 PFF — and GOOD even if Bowers plays. Ashton Jeanty GOOD (87% XFP share; LAC showed Wk1 run-D issues). LV's OL vs Tuipulotu/Mack (Mack: 2 pressures in Wk1 — "shell of his former self" per the edge-rush table). **LAC offense:** new DC O'Connell (Minter continuity) but 2025 was propped by +7.11 INT luck (2nd-highest) — downgrade the unit, upgrade the LV side. Ladd McConkey Q (rib, limited Friday, on track to play; 44% model projection; LV CB Darien Porter is OUT — helps). Quentin Johnston; Tre Harris (−0.038 separation). Omarion Hampton: 81% XFP share but 75% zone-scheme into LV's 11.7-graded zone defense — scheme downgrade. LAC: 84.3% motion (corrected league leader), 21.6% play-action. **LV defense:** −0.085 EPA/play, 13.5% sack rate (3rd) vs 6.2%, but 33.3% explosive reception rate (tied 1st-worst) vs 10.3% in 2025 — one of those is lying; 84.4% zone — NEUTRAL for LAC. LV DST case: 13.5% sacks + 40.5% pressure vs LAC's broken interior. **Trench:** LV averaged 7.12 box defenders (1st, 34.4% 8+); LV negative run rate 17.65% (30th).

Game 11 — SEA @ ARI (Sun) — SEA -3.5 to -4.5, total 40.5–41.5

SEA offense: Drew Lock starts (Darnold OUT — glute; Lock: 16/22, 187, 1 TD, 113.3 rating in relief; first road start — neutral). Jaxon Smith-Njigba GOOD: 96% routes, 45.8% share, 42.3% TPRR, 4.69 YPRR, 8/122/1; 2025-26: 3.79 YPRR/0.33 TPRR — now with Lock, so downgraded from elite to good. Cooper Kupp: 78% routes, 12.5% share. Rashid Shaheed: 70% routes. AJ Barner: 70% routes. Zach Charbonnet... no — corpus: Price 56% XFP share, 52 rush yards. **SEA defense:** −0.110 EPA/play, 86.1% zone (2nd), 79.2 man rating (tied 1st); Super Bowl LX champs — BAD for ARI. **ARI offense:** Jacoby Brissett ($5,000; top-8 in every Wk1 accuracy metric, 6th highly-accurate, 8th success rate, 2.56s TTT 3rd-fastest; just beat LAC as 9.5-point dogs — neutral). Trey McBride: 35.1% share, 13 targets, +0.289 EPA/target. Michael Wilson; Marvin Harrison Jr. un-graded in extraction — gap. Jeremiyah Love: 52% XFP share but 73% zone-scheme into SEA's 16.8-graded zone defense — downgrade. **ARI defense:** −0.153 EPA/play; 2025 collapse (28.7 pts/game) — LEAN-GOOD for SEA. **Tempo:** ARI 8.0 sec/play; cost of drops ARI 5.1 (4th, 3 drops). **Market:** SEA a True Contender (65.6, 3rd) vs ARI Bad (32.6).

Game 12 — NYJ @ GB (Sun) — GB -3.5, total 44.5–45.5

Weather: rain, gusts ~18 mph — mild downgrade to the pass games, checkdown premium. **NYJ offense:** Geno Smith is the value-QB process play ($4,800 [2P], ELITE process): 0.00% negatively-graded dropbacks (1st/30), 104.0 rating, 0 sacks, 73.1% complete; RaritosFootball: 9.3 rating, 0.37 EPA/db, 58.3% success, 95.8% on-target, 0% pressure-to-sack; composite QB #4 (98.0); 4-0 career vs Gannon-coached defenses — but only 9.3 DK points in Wk1 (process >> production). Breece Hall: 78% XFP share. Adonai Mitchell: 81% routes, 13% share, 19.6 aDOT. Isaiah Williams; Mason Taylor (67% routes, −0.11 YPRR — fade). **NYJ defense — the biggest defensive swing on the slate:** −0.264 EPA/play, 79.2 man rating (tied 1st) vs 111.5 in 2025, 2.3 man YPA (4th), 4.4 zone YPA (4th), 4.1% explosive (4th); −10.08 INT luck (highest positive regression in the league); HC Glenn calling plays (man/pressure) — BAD for GB: lockdown man + due INTs. **GB offense — fade the efficiency, stack the pass game only:** Jordan Love (54.8 QBR; composite QB #21, 41.1; 45.7% complete, −9.0 CPOE). Josh Jacobs is TD-dependent (−1.6 EPA/game, +0.70 TDs/game — the passing game is the stack piece, and Jacobs sits on the Commissioner's Exempt List per the 9/19 report — **verify status**). Matthew Golden: 56 snaps, 12 targets, 6/95 (137 air yards, 3rd) with poor 0.025 separation — projection lags role; bear case. Christian Watson: 52 snaps, 8 targets, 6/147, 62% success (2025-26: 2.85 YPRR; +0.15 coverage upgrade). Jayden Reed: 39 snaps, 7/3/20. Emanuel Wilson... no — Lloyd/Brooks vs NYJ's elite run D (Lloyd 63% XFP share). **GB defense:** −0.047 EPA/play; 48.4% blitz (2nd) vs 26.3% in 2025 —

identity question (Gannon, ex-Eagles); 3.4% explosive (3rd), 80.2 zone rating (4th), −5.00 INT luck — LEAN-GOOD for NYJ (a 48% blitz rate is exploitable by hot reads if the rate is real). **GSE-lab:** NYJ 0.2713 EPA/play in Wk1 (3rd). **Tempo:** NYJ 5.2 sec/play (2nd-fastest); NYJ six-up rate 3.5% (32nd, lowest). **Market:** GB Above Average (56.8) vs NYJ Bad (33.0).

Game 13 — MIA @ SF (Sun 4:25 ET) — SF -13.5 (also -12.5 in one file), total 44.5–46.5

Weather: ~72°F, clear — ideal, no adjustment. **Referee:** Shawn Smith — the largest over lean of the four extracted crews. **MIA offense — avoid:** Malik Willis starts (toe; practiced fully; 5 sacks in Wk1). De'Von Achane: 95% XFP share (tied #1) but 55% gap-scheme into SF's 77.9-graded gap defense with severe game-script risk (−13.5). Caleb Douglas ($3,700): 79.7 mean pool percentile — the #1 mechanical value. Malik Washington ($3,400–4,000): 79.9; 135 air yards; 0.94 slot FP/rr vs SF. (Jaylen Waddle is a Bronco in this corpus.) **MIA defense:** +0.198 EPA/play; LBs gutted (Chop Robinson OUT — concussion; Harrison OUT; Louis + Moore on IR); 7 pressures, 0 sacks vs LV — LEAN-GOOD for SF. **SF offense:** Mac Jones starts (Purdy OUT — toe; **salary unknown** — not surfaced anywhere in the corpus). Christian McCaffrey GOOD: 90% zone-scheme vs MIA's 65.2 zone yards allowed — the strongest true-lead-back preferred-scheme edge on the slate (66% XFP share). Deebo Samuel $5,300 [2P] (6/48/1, 38.9% TPRR, scored in Wk1; +0.33 coverage-model upgrade — ThunderDanDFS, 9/20). George Kittle: 2/12 in Wk1, limited (Achilles) — ramp, not a full role. Luke Farrell is a blocking-TE fade (45–46 snaps but only 16–19 routes, 2 targets, 5.9% share, 12.5% TPRR, 0.9 aDOT). **Mike Evans $6,600 [2P] — FLAG:** the pool file lists Evans on SF; no other corpus file corroborates Evans on San Francisco — do not use without resolving. Pearsall and Kirk on IR. **SF defense:** −0.079 EPA/play, −5.28 INT luck (positive regression due); held Stafford to 168 in the 27-7 Australia win; the Wk1 #25 DST finish was preseason-prior-driven; 2025 forced pressure 8.1% (2nd-worst), 75.3% rush-4 — the case is "MIA allows 40.5% pressure (hawkblogger) + Willis starts," not SF's stable pass-rush prior (37.5% forced in Wk1, n=1, directional). $3,800 [2P] (Huddle). **GSE-lab:** SF pass/rush O 80.6/93.5 vs MIA pass/rush D 32.3/12.9. **Trench:** MIA missed tackles 4.5% (4th), SF 4.8% (5th); success rates SF 58.0/58.5, MIA 35.0/23.0. **Market:** SF True Contender (64.2) vs MIA Very Bad (25.6); cmain7's model: SF W2 win prob 89.3% (peak).

Game 14 — IND @ KC (SNF) — KC -6.5, total 46.5–48.5

Weather: minor rain/wind risk, gusts ~15 mph, 75°F, 25% rain — no major adjustment. **KC offense:** Patrick Mahomes (15/27, 184, 2 TD, 1 INT, 2 sacks, 7-23-1 rushing; 4.7 team aDOT — dink-and-dunk; peripherals don't support the box score; CPOE ≈ −12.3). Isiah Pacheco... no — corpus: **J. Walker is KC's bellcow** (73% XFP share, 23-173-1, 23 vs 8 for Emmett Johnson, 34.1 DK points, RZ receiving TD; $6,500 SNF salary [2P]; apply a 5% new-team adjustment; IND runs 66.7% man — receiving is the man-beater hedge). Rashee Rice $6,400 is a mechanical trap (23.8 mean pool percentile). Xavier Worthy $4,500; Tyquan Thornton $3,400; Travis Kelce (78% routes, 20% share, 2.84 YPRR — salary not surfaced; the raw Minis extract's "Kelce vs DEN" row was corrupt — dropped). **Alec Pierce (IND) is the SNF air-yard dart:** 54.5% air-yard share (CoverageIQ), 22 routes — catch-up profile. **KC defense:** −0.261 EPA/play, 54.3% pressure (1st) vs 33.6%, +18.2 PROE (4th), 12.1% sack rate (4th), 2.2% explosive (2nd) — BAD for IND, among the slate's worst; the C-file DST thesis (53.1% pressure on Willis, 5 sacks — the most dominant Wk1 rush line). **IND offense — fade:** Daniel Jones (19/31, 166, 1 TD, 1 INT; 48.5% pressure rate while BAL blitzed only 21.2%). Jonathan Taylor: goal-line monopoly (89% snaps — #1 RB, 23/24 opportunities, 19-98-2, 4 RZ TDs, 95.8% utilization, 95% rush share; $7,500 SNF salary [2P]) — but 68% zone-scheme into KC's 23.2-graded zone defense is a GPP game-theory temper. Josh

Downs $5,400. Tyler Warren (TE — salary not surfaced in C2). **IND defense:** 66.7% man (1st) vs 36.0% in 2025, but 0.74 slot FP/rr (3rd-worst), 2.75 YPRR (worst) — the most man-heavy AND most torched: GOOD for KC. **GSE-lab:** KC rush O 100th percentile vs IND rush D 3.2 — the single most lopsided unit matchup in the lab. **Tempo:** IND 7.9 sec/play; 60.0% middle-third target rate (1st, 15/25); IND six-up 23.4% (3rd); IND negative run rate 20.0% (32nd).

Game 15 — NYG @ LAR (MNF) — LAR -7.5, total 48–48.5 (dome)

MNF history (2019–2024): average combined score 44.30 (home 22.14, away 22.17); 2020–2024 unders ≈ 71%; 2025: 9 overs, 11 unders; favorites of 7+ are 26-39-2 ATS since 2012 — the 7.5 points are historically expensive. **Referee:** Brad Allen — 83-60-1 to the under since 2016. **NYG offense:** Jaxson Dart (23/29, 230, 3 TD, 59 rush yards; success rate 2nd/32 — ELITE; highly-accurate 8th; 75% of Likely's targets in the slot; dome; $5.8K [2P] primetime; the wart is a 33.3% pressure-to-sack rate; 2.65 TTT, ≈+11.5 CPOE). Malik Nabers ($6,500 [2P] primetime): 31% share, 38% TPRR, 2.88 YPRR — faces LAR's zone-heavy outside corners (neutral, not a McDuffie shadow); 79.2% perimeter / 50% left; Lake is elite in the slot but Nabers avoids him. Darnell Mooney (NYG): 58.3% slot rate (17th), 37.5% perimeter. **Isaiah Likely is the NYG TE — and ELITE** (8/8/78/2 vs DAL; 64% routes, 27.6% share, 35% TPRR, 3.39 YPRR; 57.1% RZ share — brief-cited; LAR allowed 0.683 pass EPA/play in Wk1; salary not surfaced — gap). Cam Skattebo: 60% snaps, 18-81-1, 0 targets — two-down grinder; $5,900 [2P] primetime. **NYG defense:** +0.177 EPA/play, 52.9% man (4th), 1.9% explosive (1st), −2.64 INT luck — LEAN-BAD for LAR. **NYG secondary injuries:** Deonte Banks (calf) DNP Friday — day-to-day, confirm; Paulson Adebo to IR; Cor'Dale Flott limited (rib); Colton Hood in a bigger role if Banks sits; Nikko Reed signed. **LAR offense:** Matthew Stafford full-spectrum collapse (17/28, 168, 0 TD, 1 INT; success 5th-lowest of 30). Puka Nacua ELITE **if active** (hip — Friday DNP, confirm Saturday): 69% routes, 33.3% share, 45% TPRR, PFF's #1 WR of Wk1 (3.74 YPRR), xFP 19.3 (#9) vs actual 12.4 = +6.9 TD regression; 32.1% share, 50% first-read, 0.47 TPRR (deep dive). Davante Adams ELITE (full participant; 69% routes, 22.2% share, 30% TPRR; coverage-shell splits 2025: C1/C3/C4 rows in the deep-dive file — depleted NYG secondary). Kyren Williams: 63% snaps, 11-41-1, all 6 snaps inside the 10 — goal-line monopoly; $6,400 [2P] primetime. Blake Corum: 23% snaps, pure spell. Colby Parkinson: 59% routes, 77.8% RZ snap share, 1 catch. Aaron Donald "expects to play" (981 days; snaps unsourced). **LAR defense:** +0.262 EPA/play, 85.3% zone (3rd), 0.94 slot FP/rr (2nd-worst) — GOOD for NYG's zone-beating slot profile (NYG offense +0.397 EPA/play, +0.677/db per the defense-scheme lane's cut). Quentin Lake... no — corpus: Q. Lake? "Q. Lake — $4,500" appears in the leverage salary table as a DST-adjacent? Actually "Q. Lake — $4,500" is listed among SNF salaries in the salary reference — likely a player salary misattribution in the Minis extract; flagged, not used.

---

§4 — Position-by-Position Player Pool

All Week 1 stats are n=1. `[ELITE]/[WEAK]` flags follow the source file's own convention (§0). "Not surfaced" = not in the corpus extractions.

4.1 Quarterback

QB	Team	Salary [2P]	Composite QB rank	Wk1 / process notes	Stance
Caleb Williams	CHI	—	#1	94.8 QBR, 0.55 EPA/play, 80.8% adj comp, 10.7 aDOT, 37.3 DK pts (slate #1), 1.20 FP/db, 120.6 rating under pressure, 7 scrambles/gm	Best QB on slate; only brake is weather (13 mph, gusts 23–30)
Trevor Lawrence	JAX	$5,800	#2	18/23, 245, 4 TD; +0.82 EPA/pass; success 1st/32, YPA 3rd; 2.95 TTT, ≈+17 CPOE	Efficiency crown vs DEN man/pressure — game-theory fork
Jacoby Brissett	ARI	$5,000	#3	Top-8 every Wk1 accuracy metric; 6th highly-accurate; 8th success; 2.56s TTT (3rd-fastest); beat LAC as 9.5-pt dogs	Neutral-positive; cheap
Geno Smith	NYJ	$4,800	#4 (98.0)	0.00% negatively-graded dropbacks (1st/30); 104.0 rating; 0 sacks; 73.1% comp; 95.8% on-target; 4-0 vs Gannon	ELITE process, only 9.3 DK pts — value-QB thesis
Dak Prescott	DAL	$6,400	#5	22/34, 175, 2 TD, 1 INT; +0.59 clean vs −0.52 pressured; 29.4% pressure faced	Slate-high total; Lamb slot funnel
Drew Lock	SEA	$4,900	#7	Starts (Darnold glute OUT); 16/22, 187, 1 TD, 113.3 in relief; first road start	Neutral; leverage-solver QB
Bryce Young	CAR	$5,400	#8	23/38, 361, 3 TD, 1 INT; +0.43 EPA/play in 12p; better pressured (+0.29) than clean (+0.11); 111.9 rating under pressure (2nd); 0.81 FP/db; dome	Deep-GPP
Jaxson Dart	NYG	$5,800 primetime	#11	23/29, 230, 3 TD, 59 rush yds; success 2nd/32 ELITE; highly-accurate 8th; 2.65 TTT; ≈+11.5 CPOE; 33.3% pressure-to-sack wart; dome	Good; best MNF QB profile
Joe Burrow	CIN	$6,600	#12	Q (back); full Friday practice, expected to play, "not 100%"	Stacks live; ceiling discounted
Mac Jones	SF	**unknown**	—	Starts (Purdy OUT — toe)	**Salary not surfaced anywhere — gap**
C.J. Stroud	HOU	$5,500	#13	Highest accurate-throw rate; clean-pocket 20/27, 226, 2 TD, 0.45 EPA/db	L1 QB; Collins OUT consolidates to Schultz/Hutchinson
Jalen Hurts	PHI	$6,700	#14	Rushing floor ~2.0 EPA/gm, ~0.685 TDs/gm; only QB in elite rushing quadrant	Heat-resilient at 94–99°F
Jayden Daniels	WAS	$6,300	#15	Rushing floor; OL graded C; **pressure rate contested: PFR 18.4% vs PFF 42%** (unresolved)	Neutral; contradiction preserved
Carson Wentz	MIN	—	#16	Starts (McCarthy concussion protocol — Schefter)	Jefferson-or-nothing vehicle
Drake Maye	NE	—	#17	Lost 13-10 vs SEA; Wk1 detail not extracted	Gap
Kirk Cousins	LV	$5,000	#19	3 TD, 2 brutal INTs, little pressure	Neutral
Tyler Shough	NO	$5,300	#20	61 dropbacks, 410 yds, 3 TD, −0.017 EPA/db; 325+ in 2H/OT vs DET	Volume only; BAL 96.8 pass-D wall
Jordan Love	GB	—	#21 (41.1)	54.8 QBR; 45.7% complete; −9.0 CPOE	Fade

QB	Team	Salary [2P]	Composite QB rank	Wk1 / process notes	Stance
Matthew Stafford	LAR	—	#22	17/28, 168, 0 TD, 1 INT; success 5th-lowest/30	Full-spectrum collapse — fade
Joe Watson	CLE	—	#23	PFF 40.1 (lowest/30); 3 TWP vs 1 BTT; 16.7% sack rate; benching risk	Avoid
Justin Herbert	LAC	$6,000	#24	Not profiled beyond composite rank in extraction	Gap
Patrick Mahomes	KC	—	#25	15/27, 184, 2 TD, 1 INT; 4.7 team aDOT; peripherals don't support box score; CPOE ≈ −12.3	Neutral-negative
Baker Mayfield	TB	$5,600	#26	82.1% comp (led NFL); +15.4 CPOE (2nd/30); rushing-TD floor; revenge spot	Good
Aaron Rodgers	PIT	—	#27	Starting; Wk1 line not extracted	Gap
Malik Willis	MIA	—	#28	5 sacks Wk1; toe; practiced fully	Avoid
Daniel Jones	IND	—	#29	19/31, 166, 1 TD, 1 INT; 48.5% pressure rate vs 21.2% blitz	Fade
Cam Ward	TEN	—	#30	34.3 QBR; 48.7% complete; 7.7% sacks	Avoid
Bo Nix	DEN	$5,700	#31	PFF 33.4; 4 sacks, 3 fumbles, 1 INT; bottom-3 EPA/db, YPA, aDOT; 54.5% pressure faced	Fade
Cooper Rush	ATL	—	#32	2.6 QBR; −21.3 CPOE; 80% pressure-to-sack; 3.5 air yds/att	Unplayable
Sam Darnold	SEA	—	—	OUT (glute)	—
Brock Purdy	SF	—	—	OUT (toe); **row in raw Minis extract is stale — dropped**	—
Tua Tagovailoa	MIA	—	—	Doubtful (toe)	—
J.J. McCarthy	MIN	—	—	Concussion protocol	—
Michael Penix Jr.	ATL	—	—	Inactive	—

Composite QB ranking source: `sfdata9ers-composite-qb-rankings-week1.csv` (2026-09-18) — all 32 rows extracted; columns: QBR, EPA/play, CPOE, bad-throw%, pressure-to-sack%, air yds/rec → composite score/rank. Allen (#9) and Goff (#18) are TNF-only; L. Jackson (#10) is off-slate. Purdy's #6 row is stale (OUT). Main-slate salaries in this table are from `x-dk-main-slate-salaries-wk2.csv` (OWS) — [2P], 13-game main slate only.

4.2 Running Back

Bellcow XFP shares (the role currency): Achane 95%, Javonte 95%, Taylor 93%, Jeanty 87%, Bijan 84%, Henry 80%, Breece 78%, Etienne 71%, Swift 71%, CMC 66%, Tuten 65%, Skattebo 55%.

RB	Team	Salary [2P]	XFP	Scheme/role notes	Stance
Bijan Robinson	ATL	$8,200	84%	77% snaps; 21-83, 10 tgts/8-90-1; 52.6% share, 48% TPRR, 4.29 YPRR; the entire ATL offense with Rush	Mega-chalk; role justifies
Derrick Henry	BAL	$7,200	80%	24-144-3; 104 YAC, 4.33 YAC/att; 82.0 PFF; inside-10 83.3%, inside-5 85.7%	ELITE value below Bijan/Taylor
Jonathan Taylor	IND	$7,500 SNF	93%	89% snaps (#1 RB); 23/24 opp; 19-98-2; 4 RZ TDs; 95.8% util; 95% rush share; 68% zone into KC 23.2	Safest role; scheme temper = GPP theory
J. Walker	KC	$6,500 SNF	73%	23-173-1; 23 vs 8 Emmett Johnson; 34.1 DK pts; RZ receiving TD; 5% new-team adjustment; IND 66.7% man → receiving hedge	Bellcow at flex-friendly price
Christian McCaffrey	SF	$8,000	66%	90% zone vs MIA 65.2 zone yds — strongest true-lead-back preferred-scheme edge	L1 anchor
Ashton Jeanty	LV	—	87%	LAC Wk1 run-D issues	Good
Javonte Williams	DAL	$6,400	95%	85% opp share; 66.7% rush share; 58.3% success; inside-10 100% rush share; RZ receiving 2/2/12/1; WAS 32nd vs RBs 2025; 7.7% late-down share is the crack	STRONG SUPPORT
D'Andre Swift	CHI	$6,300	71%	Weather-game checkdown/rushing premium; MIN rush D 100th pct (GSE-lab) is the concern	L1/L2 — conflicted, retained
Kyren Williams	LAR	$6,400 primetime	—	63% snaps; 11-41-1; all 6 inside-10 snaps — goal-line monopoly	Good
Cam Skattebo	NYG	$5,900 primetime	55%	60% snaps; 18-81-1; 0 targets — two-down grinder	Neutral; salary is primetime [2P]
De'Von Achane	MIA	—	95%	55% gap into SF 77.9; severe −13.5 game-script risk	Favorable scheme, toxic script
Bhayshul Tuten	JAX	—	65%	Best raw zone/gap matchup (vs DEN 71.1/86.3 — worst combined); role uncertain	GPP-only
Travis Etienne	NO	—	71%	Kamara debuts behind him (Saints 9/18–19)	Role to confirm
Alvin Kamara	NO	—	—	0.51 rush TDs/gm below average; needs receiving to pay	Conditional
Breece Hall	NYJ	—	78%	—	Bellcow share; ungraded beyond
Rhamondre Stevenson	NE	—	74%	Henderson practiced 9/14 — role threat	Caution
Chuba Hubbard	CAR	—	—	80% zone into ATL 33.1	Scheme downgrade
Omarion Hampton	LAC	—	81%	75% zone into LV 11.7	Scheme downgrade
Tony Pollard	TEN	—	—	86% gap into PHI 25.8	Scheme downgrade
Bucky Irving	TB	—	80%	Elite interior package: LG 37%/RG 25% zone, interior 62.5% vs CLE 31/32; 3.88 YAC, 0.63 evaded/att, 62.5% success	Good
Saquon Barkley	PHI	—	75%	—	Ungraded beyond share

RB	Team	Salary [2P]	XFP	Scheme/role notes	Stance
Jaylen Warren	PIT	—	63%	—	Ungraded beyond share
Jeremiyah Love	ARI	—	52%	73% zone into SEA 16.8	Scheme downgrade
RJ Harvey	DEN	—	—	74.3 — DEN's best-graded offensive player; Q (hamstring)	Confirm status
Quinshon Judkins	CLE	—	61%	2.8 YPC	Bad/neutral
Antonio Gibson	CLE	—	—	Added; role ungraded	Gap
Kenneth Gainwell	PIT	—	—	Gap-scheme upgrade note (cross-game)	Situational
Jeremy Croskey-Merritt	WAS	—	52%	—	Ungraded beyond share
Tyjae Spears	TEN	—	55%	—	Ungraded beyond share
Aaron Jones	MIN	$5,100	—	43% snaps (Mason IR); CHI 0.380 EPA/play rushing allowed; needs route data	Conditional
MarShawn Lloyd	GB	—	63%	Jacobs on Commissioner's Exempt List (9/19 report — **verify**); vs NYJ elite run D	Downgrade; verify Jacobs
Brooks	GB	—	—	Paired with Lloyd in downgrade list	Downgrade
Price	SEA	—	56%	52 rush yards	Unprofiled
Holani	SEA	—	—	Paired with Price in downgrade list	Downgrade
Blake Corum	LAR	$4,900 primetime	—	23% snaps, pure spell	Spell only
Emmett Johnson	KC	$4,500 SNF	—	8 opps vs Walker's 23	Backup
Justice Hill	BAL	—	—	83% zone vs NO 79.0 — the Henry tell	Tell, not a play
David Montgomery	DET	—	—	TNF-only; scheme downgrade in RB table	Off-slate; one line
Dowdle	—	—	—	Scheme downgrade in RB table; team not surfaced in extraction	Not usable

Scheme-downgrade ledger (RB table, 9/18): Hampton, Chase Brown, Pollard, Hubbard, Lloyd/Brooks, Price/Holani, Montgomery — all downgraded on zone/gap fit. Sub-10-attempt scheme samples are directional only.

4.3 Wide Receiver / Tight End — the full 101-player pool

Qualification: Week 1 route share >50% OR target share >15% (RotoWire, updated 2026-09-15). Columns per row: Route% | Targets (share) | TPRR | Rec yds | YPRR | aDOT | Air-yard share — then qualifying-pool percentiles, salary, matchup note, and the role-vs-salary value read. Percentiles are

WITHIN this 101-player pool (pool file: [ELITE] >=90th, [WEAK] <=25th). "Ancillary: not publicly surfaced" is preserved where the file states it. Every salary is [2P].

1. **Mack Hollins (WR)** [NE] — 50.0 | 5 (16.1%) | 23.8% | 51 | 2.43 | 13.4 | 33.8% — Pct: Route 6 [WEAK] · Tgt sh 43 · TPRR 65 · YPRR 77 · aDOT 70 · Air sh 72. Qual: target share 16.1% > 15%.. Sal: $4,300 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Pittsburgh ran 96.2% zone with a league-low 10.5% blitz rate in Week 1, so New England's pass game faces disguise-zone rather than a blitz-heavy look (defense-scheme lane, 2026-09-19); second-half rain is forecast at Foxborough (StormTeam 5 via Patriots Wire, 2026-09-18). Value: $4,300 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at YPRR (77th percentile) and weakest at Route (6th percentile [WEAK]); all percentiles are qualifying-pool percentiles.
2. **Demario Douglas (WR)** [NE] — 79.0 | 7 (22.6%) | 21.2% | 20 | 0.61 | 5.8 | 20.4% — Pct: Route 64 · Tgt sh 77 · TPRR 57 · YPRR 21 [WEAK] · aDOT 29 · Air sh 48. Qual: route participation 79.0% > 50% and target share 22.6% > 15%.. Sal: $3,800 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Pittsburgh ran 96.2% zone with a league-low 10.5% blitz rate in Week 1, so New England's pass game faces disguise-zone rather than a blitz-heavy look (defense-scheme lane, 2026-09-19); second-half rain is forecast at Foxborough (StormTeam 5 via Patriots Wire, 2026-09-18). Value: $3,800 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Tgt sh (77th percentile) and weakest at YPRR (21st percentile [WEAK]); all percentiles are qualifying-pool percentiles.
3. **Romeo Doubs (WR) [FLAG: pool file places Doubs on NE; other lanes treat him as GB]** [NE] — 69.0 | 3 (9.7%) | 10.3% | 0 | 0.00 | 21.3 | 32.3% — Pct: Route 39 · Tgt sh 22 [WEAK] · TPRR 18 [WEAK] · YPRR 6 [WEAK] · aDOT 93 [ELITE] · Air sh 66. Qual: route participation 69.0% > 50%.. Sal: $5,000 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Pittsburgh ran 96.2% zone with a league-low 10.5% blitz rate in Week 1, so New England's pass game faces disguise-zone rather than a blitz-heavy look (defense-scheme lane, 2026-09-19); second-half rain is forecast at Foxborough (StormTeam 5 via Patriots Wire, 2026-09-18). Value: $5,000 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at aDOT (93rd percentile [ELITE]) and weakest at YPRR (6th percentile [WEAK]); all percentiles are qualifying-pool percentiles.
4. **Hunter Henry (TE)** [NE] — 62.0 | 3 (9.7%) | 11.5% | 26 | 1.00 | 3.5 | 5.3% — Pct: Route 23 [WEAK] · Tgt sh 22 [WEAK] · TPRR 24 [WEAK] · YPRR 35 · aDOT 10 [WEAK] · Air sh 10 [WEAK]. Matchup: Drew Lock starts with Sam Darnold (glute) ruled OUT (USA Today, 2026-09-16; seahawkswire, 2026-09-18); Arizona's 2025 defense finished 29th in points and 27th in total defense (GamblingUSA, 2026-09-17). Value: $3,300 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Route (44th percentile) and weakest at aDOT (0th percentile [WEAK]); all percentiles are qualifying-pool percentiles.
8. **Jaxon Smith-Njigba (WR)** [SEA (@ ARI] — 96.0 | 11 (45.8%) | 42.3% | 122 | 4.69 | 7.3 | 54.5% — Pct: Route 98 [ELITE] · Tgt sh 100 [ELITE] · TPRR 96 [ELITE] · YPRR 98 [ELITE] · aDOT 36 · Air sh 98 [ELITE]. Qual: route participation 96.0% > 50% and target share 45.8% > 15%.. Sal: not publicly surfaced from allowed sources. Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Drew Lock starts with Sam Darnold (glute) ruled OUT (USA Today, 2026-09-16; seahawkswire, 2026-09-18); Arizona's 2025 defense finished 29th in points and 27th in total defense (GamblingUSA, 2026-09-17). JSN's 45.8% target share (42.3% TPRR) now comes with Drew Lock starting (RotoWire, updated 2026-09-15; seahawkswire, 2026-09-18). Value: not publicly surfaced from allowed sources, so no salary-based value read is possible (The Huddle, published 2026-09-19; DK Network, dated 2026-09-15). The role case is the Week 1 usage table above (RotoWire, updated 2026-09-15).
9. **Mike Evans (WR)** [SF] — 64.0 | 7 (20.6%) | 30.4% | 49 | 2.13 | 8.9 | 40.0% — Pct: Route 28 · Tgt sh 63 · TPRR 85 · YPRR 70 · aDOT 44 · Air sh 88. Qual: route participation 64.0% > 50% and target share 20.6% > 15%.. Sal: $6,600 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Mac Jones starts with Brock Purdy (toe) ruled OUT (Yardbarker/NFLTradeRumors, 2026-09-18, updated 2026-09-19); Miami generated 0 sacks on 7 pressures in Week 1 with a gutted LB corps (USA Today, 2026-09-16). Evans posted a 30.4% TPRR in Week 1 (RotoWire, updated 2026-09-15), now with Mac Jones starting. Value: $6,600 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Air sh (88th percentile) and weakest at Route (28th percentile); all percentiles are qualifying-pool percentiles.

10. **Deebo Samuel (WR)** [SF] — 50.0 | 7 (20.6%) | 38.9% | 48 | 2.67 | 2.5 | 11.4% — Pct: Route 6 [WEAK] · Tgt sh 63 · TPRR 93 [ELITE] · YPRR 81 · aDOT 6 [WEAK] · Air sh 28. Qual: target share 20.6% > 15%.. Sal: $5,300 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Mac Jones starts with Brock Purdy (toe) ruled OUT (Yardbarker/NFLTradeRumors, 2026-09-18, updated 2026-09-19); Miami generated 0 sacks on 7 pressures in Week 1 with a gutted LB corps (USA Today, 2026-09-16). Samuel scored in Week 1 (6/48/1) but now catches passes from Mac Jones with Purdy OUT (RotoWire, updated 2026-09-15; Yardbarker/NFLTradeRumors, 2026-09-18). Value: $5,300 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at TPRR (93rd percentile [ELITE]) and weakest at aDOT (6th percentile [WEAK]); all percentiles are qualifying-pool percentiles.
11. **Colby Parkinson (TE)** [LAR] — 59.0 | 2 (7.4%) | 11.8% | 6 | 0.35 | 5.2 | 4.4% — Pct: Route 19 [WEAK] · Tgt sh 13 [WEAK] · TPRR 25 · YPRR 16 [WEAK] · aDOT 23 [WEAK] · Air sh 8 [WEAK]. Qual: route participation 59.0% > 50%.. Sal: not publicly surfaced from allowed sources. Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: The Giants placed Paulson Adebo on IR (knee) on 2026-09-18 and Deonte Banks (calf) DNP'd Friday (Giants Wire/FantasyPros, 2026-09-18); the Rams ran 13 personnel on 36.8% of Week 1 snaps, second-highest in the NFL (Sharp Football, 2026-09-15). Parkinson played 77% of snaps with a team-high 77.8% red-zone snap share but produced 1 catch for 6 yards (Sharp Football, 2026-09-15; SNF/MNF addendum, 2026-09-19). Value: not publicly surfaced from allowed sources, so no salary-based value read is possible (The Huddle, published 2026-09-19; DK Network, dated 2026-09-15). The role case is the Week 1 usage table above (RotoWire, updated 2026-09-15).
12. **Adonai Mitchell (WR)** [NYJ] — 81.0 | 3 (13.0%) | 14.0% | 60 | 2.73 | 19.6 | 38.1% — Pct: Route 69 · Tgt sh 30 · TPRR 30 · YPRR 82 · aDOT 90 [ELITE] · Air sh 82. Qual: route participation 81.0% > 50%.. Sal: $4,000 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Green Bay blitzed at 48.4% in Week 1, second in the NFL vs 26.3% in 2025 (defense-scheme lane, 2026-09-19), and allowed only 0.51 perimeter FP/route (StatRankings teams, 2026-09-18). Value: $4,000 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at aDOT (90th percentile [ELITE]) and weakest at Tgt sh (30th percentile); all percentiles are qualifying-pool percentiles.
13. **Isaiah Williams (WR)** [NYJ] — 74.0 | 1 (4.3%) | 5.0% | 7 | 0.35 | 7.7 | 5.0% — Pct: Route 49 · Tgt sh 4 [WEAK] · TPRR 4 [WEAK] · YPRR 15 [WEAK] · aDOT 40 · Air sh 8 [WEAK]. Qual: route participation 74.0% > 50%.. Sal: not publicly surfaced from allowed sources. Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Green Bay blitzed at 48.4% in Week 1, second in the NFL vs 26.3% in 2025 (defense-scheme lane, 2026-09-19), and allowed only 0.51 perimeter FP/route (StatRankings teams, 2026-09-18). Value: not publicly surfaced from allowed sources, so no salary-based value read is possible (The Huddle, published 2026-09-19; DK Network, dated 2026-09-15). The role case is the Week 1 usage table above (RotoWire, updated 2026-09-15).
14. **Mason Taylor (TE)** [NYJ] — 67.0 | 3 (13.0%) | 17.0% | -2 | -0.11 | 0.6 | 1.1% — Pct: Route 34 · Tgt sh 30 · TPRR 44 · YPRR 2 [WEAK] · aDOT 4 [WEAK] · Air sh 4 [WEAK]. Qual: route participation 67.0% > 50%.. Sal: not publicly surfaced from allowed sources. Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Green Bay blitzed at 48.4% in Week 1, second in the NFL vs 26.3% in 2025 (defense-scheme lane, 2026-09-19), and allowed only 0.51 perimeter FP/route (StatRankings teams,

2026-09-18). Value: not publicly surfaced from allowed sources, so no salary-based value read is possible (The Huddle, published 2026-09-19; DK Network, dated 2026-09-15). The role case is the Week 1 usage table above (RotoWire, updated 2026-09-15).

15. **Carnell Tate (WR)** [TEN] — 85.0 | 6 (21.4%) | 18.0% | 38 | 1.15 | 10.2 | 38.2% — Pct: Route 79 · Tgt sh 69 · TPRR 48 · YPRR 44 · aDOT 52 · Air sh 84. Qual: route participation 85.0% > 50% and target share 21.4% > 15%.. Sal: $5,100 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Philadelphia brings +19.0 pressure-over-expected (2nd in NFL) with 4.2 YPA allowed vs zone (defense-scheme lane, 2026-09-19); this is the slate's lowest total at 39.5 (games-phase consensus, 2026-09-19). Value: $5,100 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Air sh (84th percentile) and weakest at YPRR (44th percentile); all percentiles are qualifying-pool percentiles.
16. **Wan'Dale Robinson (WR) [FLAG: pool file places Wan'Dale on TEN; coverage-matchups lane references him as NYG's WR2 and NYG's pool section has no Wan'Dale — likely file labeling error]** [TEN] — 79.0 | 6 (21.4%) | 19.0% | 38 | 1.23 | 3.9 | 14.6% — Pct: Route 64 · Tgt sh 69 · TPRR 51 · YPRR 47 · aDOT 13 [WEAK] · Air sh 35. Qual: route participation 79.0% > 50% and target share 21.4% > 15%.. Sal: $4,600 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Philadelphia brings +19.0 pressure-over-expected (2nd in NFL) with 4.2 YPA allowed vs zone (defense-scheme lane, 2026-09-19); this is the slate's lowest total at 39.5 (games-phase consensus, 2026-09-19). Value: $4,600 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Tgt sh (69th percentile) and weakest at aDOT (13th percentile [WEAK]); all percentiles are qualifying-pool percentiles.
17. **Calvin Ridley (WR)** [TEN] — [table row not parsed] — Pct: Route 19 [WEAK] · Tgt sh 0 [WEAK] · TPRR 0 [WEAK] · YPRR 6 [WEAK] · aDOT n/a · Air sh n/a. Qual: route participation 59.0% > 50%.. Sal: $4,100 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Philadelphia brings +19.0 pressure-over-expected (2nd in NFL) with 4.2 YPA allowed vs zone (defense-scheme lane, 2026-09-19); this is the slate's lowest total at 39.5 (games-phase consensus, 2026-09-19). Value: $4,100 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Route (19th percentile [WEAK]) and weakest at Tgt sh (0th percentile [WEAK]); all percentiles are qualifying-pool percentiles.
18. **Gunnar Helm (TE)** [TEN] — 54.0 | 5 (17.9%) | 24.0% | 28 | 1.33 | 4.7 | 14.6% — Pct: Route 8 [WEAK] · Tgt sh 50 · TPRR 68 · YPRR 53 · aDOT 16 [WEAK] · Air sh 35. Qual: route participation 54.0% > 50% and target share 17.9% > 15%.. Sal: $3,100 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Philadelphia brings +19.0 pressure-over-expected (2nd in NFL) with 4.2 YPA allowed vs zone (defense-scheme lane, 2026-09-19); this is the slate's lowest total at 39.5 (games-phase consensus, 2026-09-19). Value: $3,100 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at TPRR (68th percentile) and weakest at Route (8th percentile [WEAK]); all percentiles are qualifying-pool percentiles.
19. **Nico Collins (WR) — — OUT** [HOU] — 86.0 | 10 (27.0%) | 28.0% | 75 | 2.08 | 12.6 | 43.6% — Pct: Route 82 · Tgt sh 89 · TPRR 79 · YPRR 67 · aDOT 66 · Air sh 92 [ELITE]. Qual: route participation 86.0% > 50% and target share 27.0% > 15%.. Sal: not publicly surfaced from allowed sources. Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone

splits: not publicly surfaced.. Matchup: Nico Collins (hamstring) is OUT (texanswire, 2026-09-18), consolidating targets; Cincinnati's linebackers were PFF's worst coverage unit in 2025 (34.4 team grade; PFF Bengals preview/Heavy, July 2026). Collins is OUT and not playable; his absence consolidates Houston targets onto the remaining pool qualifiers (texanswire, 2026-09-18). Value: OUT — ruled OUT (hamstring; texanswire, 2026-09-18). Not playable and not a value; section retained for pool completeness only.

20. **Kayshon Boutte (WR)** [HOU] — 60.0 | 2 (5.4%) | 8.0% | 21 | 0.84 | 15.7 | 10.9% — Pct: Route 22 [WEAK] · Tgt sh 6 [WEAK] · TPRR 12 [WEAK] · YPRR 30 · aDOT 82 · Air sh 26. Qual: route participation 60.0% > 50%.. Sal: $4,000 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Nico Collins (hamstring) is OUT (texanswire, 2026-09-18), consolidating targets; Cincinnati's linebackers were PFF's worst coverage unit in 2025 (34.4 team grade; PFF Bengals preview/Heavy, July 2026). With Collins OUT, Boutte is the next qualifying HOU WR in the pool (RotoWire, updated 2026-09-15; texanswire, 2026-09-18). Value: $4,000 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at aDOT (82nd percentile) and weakest at Tgt sh (6th percentile [WEAK]); all percentiles are qualifying-pool percentiles.

21. **Kalif Raymond (WR)** [CHI] — 56.0 | 9 (36.0%) | 41.0% | 84 | 3.82 | 7.0 | 24.2% — Pct: Route 10 [WEAK] · Tgt sh 98 [ELITE] · TPRR 95 [ELITE] · YPRR 94 [ELITE] · aDOT 32 · Air sh 54. Qual: route participation 56.0% > 50% and target share 36.0% > 15%.. Sal: $3,600 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Minnesota blitzed at 80.4% in Week 1 but allowed a 33.3% explosive rate (StatRankings teams, 2026-09-18); MIN@CHI is the slate's weather game (13 mph winds, gusts to 23, rain — Sharp, updated 2026-09-19). Value: $3,600 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Tgt sh (98th percentile [ELITE]) and weakest at Route (10th percentile [WEAK]); all percentiles are qualifying-pool percentiles.

22. **Colston Loveland (TE)** [CHI] — 82.0 | 1 (4.0%) | 3.0% | 0 | 0.00 | 14.9 | 5.8% — Pct: Route 73 · Tgt sh 2 [WEAK] · TPRR 2 [WEAK] · YPRR 6 [WEAK] · aDOT 78 · Air sh 12 [WEAK]. Matchup: Tampa Bay blitzes at 45.9% (4th in NFL; defense-scheme lane, 2026-09-19); Cleveland's offense sits at -0.493 EPA/play with Deshaun Watson grading 40.1 by PFF (QB lane, 2026-09-19); PM thunderstorm risk in Tampa (weather.com, 2026-09-19). Value: $4,100 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at YPRR (40th percentile) and weakest at Air sh (6th percentile [WEAK]); all percentiles are qualifying-pool percentiles.

30. **Jakobi Meyers (WR)** [JAX (@ DEN] — 76.0 | 2 (9.5%) | 11.0% | 40 | 2.11 | 19.2 | 16.3% — Pct: Route 54 · Tgt sh 20 [WEAK] · TPRR 21 [WEAK] · YPRR 69 · aDOT 90 · Air sh 40. Qual: route participation 76.0% > 50%.. Sal: $4,900 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Denver plays 58.6% man with +20.4 pressure-over-expected (StatRankings teams, 2026-09-18) and allowed the 7th-fewest passing yards in 2025 (SI, 2026-09-16). Value: $4,900 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at aDOT (90th percentile) and weakest at Tgt sh (20th percentile [WEAK]); all percentiles are qualifying-pool percentiles.

31. **Brenton Strange (TE)** [JAX (@ DEN] — 60.0 | 3 (14.3%) | 20.0% | 23 | 1.53 | 11.5 | 14.7% — Pct: Route 22 [WEAK] · Tgt sh 38 · TPRR 54 · YPRR 57 · aDOT 58 · Air sh 36. Qual: route participation 60.0% > 50%.. Sal: $3,900 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Denver plays 58.6% man with +20.4 pressure-over-expected (StatRankings teams, 2026-09-18) and allowed the 7th-fewest passing yards in 2025 (SI, 2026-09-16). Value: $3,900 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at aDOT (58th percentile) and weakest at Route (22nd percentile [WEAK]); all percentiles are qualifying-pool percentiles.

32. **Kyle Pitts (TE)** [ATL] — 81.0 | 1 (5.3%) | 5.0% | 0 | 0.00 | 26.4 | 34.3% — Pct: Route 69 · Tgt sh 5 [WEAK] · TPRR 4 [WEAK] · YPRR 6 [WEAK] · aDOT 96 [ELITE] · Air sh 74. Qual: route participation 81.0% > 50%.. Sal: $4,500 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Cooper Rush starts again (NY Post/Heavy/SI, 2026-09-18) and was the week's worst QB by QBR (2.6), CPOE (-21.3) and pressure-to-sack rate (80%) (QB lane, 2026-09-19); USA Today (2026-09-18) still slots London as a WR2 and says Pitts ‘could be replaced.’ Pitts ran 81% of routes but drew one target (5% TPRR) with zero catches in Week 1 (advanced-metrics lane, 2026-09-19). Value: $4,500 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at aDOT (96th percentile [ELITE]) and weakest at TPRR (4th percentile [WEAK]); all percentiles are qualifying-pool percentiles.

33. **Drake London (WR)** [ATL] — 92.0 | 4 (21.1%) | 17.0% | 29 | 1.21 | 7.5 | 39.0% — Pct: Route 94 [ELITE] · Tgt sh 67 · TPRR 44 · YPRR 46 · aDOT 38 · Air sh 86. Qual: route participation 92.0% > 50% and target share 21.1% > 15%.. Sal: $6,000 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Cooper Rush starts again (NY Post/Heavy/SI, 2026-09-18) and was the week's worst QB by QBR (2.6), CPOE (-21.3) and pressure-to-sack rate (80%) (QB lane, 2026-09-19);

USA Today (2026-09-18) still slots London as a WR2 and says Pitts ‘could be replaced.’ London's ceiling is capped by Rush, though USA Today (2026-09-18) still slots him as a WR2. Value: $6,000 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Route (94th percentile [ELITE]) and weakest at aDOT (38th percentile); all percentiles are qualifying-pool percentiles.

34. **Jahan Dotson (WR)** [ATL] — 69.0 | 3 (15.8%) | 17.0% | 19 | 1.06 | 15.5 | 60.5% — Pct: Route 39 · Tgt sh 42 · TPRR 44 · YPRR 41 · aDOT 80 · Air sh 98 [ELITE]. Qual: route participation 69.0% > 50% and target share 15.8% > 15%.. Sal: not publicly surfaced from allowed sources. Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Cooper Rush starts again (NY Post/Heavy/SI, 2026-09-18) and was the week's worst QB by QBR (2.6), CPOE (-21.3) and pressure-to-sack rate (80%) (QB lane, 2026-09-19); USA Today (2026-09-18) still slots London as a WR2 and says Pitts ‘could be replaced.’ Value: not publicly surfaced from allowed sources, so no salary-based value read is possible (The Huddle, published 2026-09-19; DK Network, dated 2026-09-15). The role case is the Week 1 usage table above (RotoWire, updated 2026-09-15).

35. **Pat Freiermuth (TE)** [PIT (@ NE] — 72.0 | 5 (13.5%) | 16.0% | 46 | 1.48 | 5.4 | 7.7% — Pct: Route 45 · Tgt sh 32 · TPRR 39 · YPRR 54 · aDOT 26 · Air sh 14 [WEAK]. Qual: route participation 72.0% > 50%.. Sal: $3,700 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: New England blitzed at 48.1% in Week 1 (StatRankings teams, 2026-09-18); Michael Pittman is questionable (foot, DNP Thu/Fri, trending the wrong way — Steelers Wire, 2026-09-19), which would condense targets toward Metcalf and Freiermuth. Value: $3,700 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at YPRR (54th percentile) and weakest at Air sh (14th percentile [WEAK]); all percentiles are qualifying-pool percentiles.

36. **DK Metcalf (WR)** [PIT (@ NE] — 93.0 | 10 (27.0%) | 25.0% | 40 | 1.00 | 18.2 | 51.6% — Pct: Route 96 [ELITE] · Tgt sh 89 · TPRR 72 · YPRR 35 · aDOT 88 · Air sh 96 [ELITE]. Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: The Jets are home underdogs (+3.5) in a 44.5–45.5-total game (games-phase consensus, 2026-09-19); no Jets-defense coverage splits surfaced in the dated 2026 material. Value: $4,500 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at TPRR (68th percentile) and weakest at Air sh (22nd percentile [WEAK]); all percentiles are qualifying-pool percentiles.

74. **Josh Oliver (TE)** [MIN (@ CHI] — 30.0 | 4 (17.4%) | 44.0% | 22 | 2.44 | 3.6 | 7.8% — Pct: Route 2 [WEAK] · Tgt sh 47 · TPRR 98 [ELITE] · YPRR 78 · aDOT 10 [WEAK] · Air sh 16 [WEAK]. Qual: target share 17.4% > 15%.. Sal: not publicly surfaced from allowed sources. Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Chicago played 65.2% man coverage in Week 1, second-highest in the NFL (Brad Biggs/ Chicago Tribune via Lee Enterprises, 2026-09-17), while outside CBs Jaylon Johnson and Tyrique

Stevenson allowed 113.7 and 158.3 passer ratings (Bears Wire, 2026-09-14); Carson Wentz starts for the concussed Kyler Murray (Vikings Wire, 2026-09-18) and Jauan Jennings is OUT (personal matter — Vikings Wire, 2026-09-18). Oliver posted the team's second-best offensive PFF grade (76.5) and could keep cutting into Hockenson's snaps (SI, 2026-09-15). Value: not publicly surfaced from allowed sources, so no salary-based value read is possible (The Huddle, published 2026-09-19; DK Network, dated 2026-09-15). The role case is the Week 1 usage table above (RotoWire, updated 2026-09-15).

75. **T.J. Hockenson (TE)** [MIN (@ CHI] — 63.0 | 5 (21.7%) | 26.0% | 36 | 1.89 | 5.0 | 13.7% — Pct: Route 25 [WEAK] · Tgt sh 72 · TPRR 74 · YPRR 63 · aDOT 20 [WEAK] · Air sh 32. Qual: route participation 63.0% > 50% and target share 21.7% > 15%.. Sal: $3,500 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Chicago played 65.2% man coverage in Week 1, second-highest in the NFL (Brad Biggs/Chicago Tribune via Lee Enterprises, 2026-09-17), while outside CBs Jaylon Johnson and Tyrique Stevenson allowed 113.7 and 158.3 passer ratings (Bears Wire, 2026-09-14); Carson Wentz starts for the concussed Kyler Murray (Vikings Wire, 2026-09-18) and Jauan Jennings is OUT (personal matter — Vikings Wire, 2026-09-18). Hockenson caught 4/36/1 in Week 1 (RotoWire, updated 2026-09-15; coverage-matchups lane, 2026-09-19). Value: $3,500 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at TPRR (74th percentile) and weakest at aDOT (20th percentile [WEAK]); all percentiles are qualifying-pool percentiles.

76. **Justin Jefferson (WR)** [MIN (@ CHI] — 97.0 | 9 (39.1%) | 31.0% | 92 | 3.17 | 9.4 | 46.3% — Pct: Route 99 [ELITE] · Tgt sh 98 [ELITE] · TPRR 86 · YPRR 89 · aDOT 48 · Air sh 92 [ELITE]. Qual: route participation 97.0% > 50% and target share 39.1% > 15%.. Sal: $7,800 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Chicago played 65.2% man coverage in Week 1, second-highest in the NFL (Brad Biggs/Chicago Tribune via Lee Enterprises, 2026-09-17), while outside CBs Jaylon Johnson and Tyrique Stevenson allowed 113.7 and 158.3 passer ratings (Bears Wire, 2026-09-14); Carson Wentz starts for the concussed Kyler Murray (Vikings Wire, 2026-09-18) and Jauan Jennings is OUT (personal matter — Vikings Wire, 2026-09-18). Jefferson's 52.9% first-read share and 88.11 Weighted Opportunity Rating top the slate's role data (StatRankings free leaderboards, 2026-09-18; advanced deep dive, 2026-09-19). Value: $7,800 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Route (99th percentile [ELITE]) and weakest at aDOT (48th percentile); all percentiles are qualifying-pool percentiles.

77. **Jordan Addison (WR)** [MIN (@ CHI] — 87.0 | 2 (8.7%) | 8.0% | 0 | 0.00 | 14.5 | 15.9% — Pct: Route 85 · Tgt sh 18 [WEAK] · TPRR 12 [WEAK] · YPRR 6 [WEAK] · aDOT 76 · Air sh 40. Qual: route participation 87.0% > 50%.. Sal: $5,100 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Chicago played 65.2% man coverage in Week 1, second-highest in the NFL (Brad Biggs/Chicago Tribune via Lee Enterprises, 2026-09-17), while outside CBs Jaylon Johnson and Tyrique Stevenson allowed 113.7 and 158.3 passer ratings (Bears Wire, 2026-09-14); Carson Wentz starts for the concussed Kyler Murray (Vikings Wire, 2026-09-18) and Jauan Jennings is OUT (personal matter — Vikings Wire, 2026-09-18). Addison's 87% route share came with 0 catches and an 8% TPRR (coverage-matchups/advanced lanes, 2026-09-19); PFF projects his heaviest coverage splits vs Johnson and Stevenson (PFF player page, accessed 2026-09-19). Value: $5,100 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated

2026-09-15) is strongest at Route (85th percentile) and weakest at YPRR (6th percentile [WEAK]); all percentiles are qualifying-pool percentiles.

78. **Jauan Jennings (WR) — — OUT** [MIN (@ CHI] — 57.0 | 1 (4.3%) | 6.0% | 0 | 0.00 | 24.6 | 13.5% — Pct: Route 11 [WEAK] · Tgt sh 4 [WEAK] · TPRR 5 [WEAK] · YPRR 6 [WEAK] · aDOT 96 [ELITE] · Air sh 30. Qual: route participation 57.0% > 50%.. Sal: not publicly surfaced from allowed sources. Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Chicago played 65.2% man coverage in Week 1, second-highest in the NFL (Brad Biggs/Chicago Tribune via Lee Enterprises, 2026-09-17), while outside CBs Jaylon Johnson and Tyrique Stevenson allowed 113.7 and 158.3 passer ratings (Bears Wire, 2026-09-14); Carson Wentz starts for the concussed Kyler Murray (Vikings Wire, 2026-09-18) and Jauan Jennings is OUT (personal matter — Vikings Wire, 2026-09-18). Jennings is OUT and not playable; his absence condenses Minnesota targets toward Jefferson and Addison (Vikings Wire, 2026-09-18). Value: OUT — OUT (personal matter; Vikings Wire, 2026-09-18). Not playable and not a value; section retained for pool completeness only.

79. **Chig Okonkwo (TE) — — OUT** [WAS (@ DAL] — 58.0 | 3 (10.3%) | 14.0% | 16 | 0.73 | 12.8 | 15.4% — Pct: Route 15 [WEAK] · Tgt sh 23 [WEAK] · TPRR 30 · YPRR 28 · aDOT 68 · Air sh 38. Qual: route participation 58.0% > 50%.. Sal: not publicly surfaced from allowed sources. Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Dallas allowed +0.397 EPA/play and 62.1% success in Week 1 (defense-scheme lane, 2026-09-19) and is without FS Malik Hooker (IR, forearm) and LB DeMarvion Overshown (hamstring) (Commanders Wire, 2026-09-19); this is the week's highest total at 50.5–51.5 (games-phase consensus, 2026-09-19). Okonkwo is OUT and not playable (Commanders Wire, 2026-09-19). Value: OUT — ruled OUT (hamstring; Commanders Wire, 2026-09-19). Not playable and not a value; section retained for pool completeness only.

80. **Terry McLaurin (WR)** [WAS (@ DAL] — 92.0 | 4 (13.8%) | 11.0% | 14 | 0.40 | 5.3 | 8.5% — Pct: Route 94 [ELITE] · Tgt sh 36 · TPRR 21 [WEAK] · YPRR 17 [WEAK] · aDOT 24 [WEAK] · Air sh 18 [WEAK]. Qual: route participation 92.0% > 50%.. Sal: $5,200 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Dallas allowed +0.397 EPA/play and 62.1% success in Week 1 (defense-scheme lane, 2026-09-19) and is without FS Malik Hooker (IR, forearm) and LB DeMarvion Overshown (hamstring) (Commanders Wire, 2026-09-19); this is the week's highest total at 50.5–51.5 (games-phase consensus, 2026-09-19). McLaurin draws DaRon Bland, Dallas's best cover man, in the marquee outside matchup (coverage-matchups lane, 2026-09-19). Value: $5,200 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Route (94th percentile [ELITE]) and weakest at YPRR (17th percentile [WEAK]); all percentiles are qualifying-pool percentiles.

81. **Stefon Diggs (WR)** [WAS (@ DAL] — 66.0 | 9 (31.0%) | 36.0% | 55 | 2.20 | 9.2 | 33.0% — Pct: Route 32 · Tgt sh 95 [ELITE] · TPRR 90 · YPRR 71 · aDOT 46 · Air sh 68. Qual: route participation 66.0% > 50% and target share 31.0% > 15%.. Sal: $5,300 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Dallas allowed +0.397 EPA/play and 62.1% success in Week 1 (defense-scheme lane, 2026-09-19) and is without FS Malik Hooker (IR, forearm) and LB DeMarvion Overshown (hamstring) (Commanders Wire, 2026-09-19); this is the week's highest total at 50.5–51.5 (games-phase consensus, 2026-09-19). RotoWire's 2026-09-18 stack read prefers McLaurin over Diggs in the WAS@DAL game (consensus-map, 2026-09-19). Value: $5,300 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated

2026-09-15) is strongest at Tgt sh (95th percentile [ELITE]) and weakest at Route (32nd percentile); all percentiles are qualifying-pool percentiles.

82. **Dyami Brown (WR)** [WAS (@ DAL] — 58.0 | 2 (6.9%) | 9.0% | 0 | 0.00 | 30.6 | 24.4% — Pct: Route 15 [WEAK] · Tgt sh 11 [WEAK] · TPRR 16 [WEAK] · YPRR 6 [WEAK] · aDOT 98 [ELITE] · Air sh 54. Qual: route participation 78.0% > 50% and target share 26.7% > 15%.. Sal: $7,300 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Washington plays 82.1% zone with a 35.1% slot target rate allowed (StatRankings teams, 2026-09-18) in the week's highest-total game (50.5–51.5; games-phase consensus, 2026-09-19). Lamb's big-slot role meets Washington's 35.1% slot target rate allowed (StatRankings teams, 2026-09-18; advanced deep dive, 2026-09-19). Value: $7,300 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Tgt sh (88th percentile) and weakest at aDOT (58th percentile); all percentiles are qualifying-pool percentiles.

90. **Ryan Flournoy (WR)** [DAL] — 69.0 | 4 (13.3%) | 16.0% | 22 | 0.88 | 5.7 | 9.7% — Pct: Route 39 · Tgt sh 31 · TPRR 39 · YPRR 32 · aDOT 28 · Air sh 22 [WEAK]. Qual: route participation 69.0% > 50%.. Sal: $3,800 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Washington plays 82.1% zone with a 35.1% slot target rate allowed (StatRankings teams, 2026-09-18) in the week's highest-total game (50.5–51.5; games-phase consensus, 2026-09-19). Value: $3,800 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Route (39th percentile) and weakest at Air sh (22nd percentile [WEAK]); all percentiles are qualifying-pool percentiles.

91. **Isaiah Likely (TE)** [NYG (@ LAR] — 64.0 | 8 (27.6%) | 35.0% | 78 | 3.39 | 8.4 | 27.1% — Pct: Route 28 · Tgt sh 92 [ELITE] · TPRR 89 · YPRR 90 · aDOT 42 · Air sh 57. Qual: route participation 64.0% > 50% and target share 27.6% > 15%.. Sal: not publicly surfaced from allowed sources. Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not

publicly surfaced.. Matchup: The Rams play 85.3% zone (StatRankings teams, 2026-09-18) and allowed 0.683 pass EPA/play in Week 1 (StatRankings teams, 2026-09-18); Jaxson Dart debuted 23-of-29 for 230 yards and 3 TDs in Week 1 (Sportradar via SNF/MNF addendum, 2026-09-19). Likely caught all 8 targets for 78 yards and 2 TDs in Week 1 vs DAL (Sportradar via SNF/MNF addendum, 2026-09-19); the Rams allowed 0.683 pass EPA/play in Week 1. Value: not publicly surfaced from allowed sources, so no salary-based value read is possible (The Huddle, published 2026-09-19; DK Network, dated 2026-09-15). The role case is the Week 1 usage table above (RotoWire, updated 2026-09-15).

92. **Darnell Mooney (WR)** [NYG (@ LAR] — 69.0 | 2 (6.9%) | 8.0% | 27 | 1.08 | 12.6 | 10.1% — Pct: Route 39 · Tgt sh 11 [WEAK] · TPRR 12 [WEAK] · YPRR 42 · aDOT 66 · Air sh 24 [WEAK]. Qual: route participation 69.0% > 50%.. Sal: not publicly surfaced from allowed sources. Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: The Rams play 85.3% zone (StatRankings teams, 2026-09-18) and allowed 0.683 pass EPA/play in Week 1 (StatRankings teams, 2026-09-18); Jaxson Dart debuted 23-of-29 for 230 yards and 3 TDs in Week 1 (Sportradar via SNF/MNF addendum, 2026-09-19). Mooney runs 58.3% of his routes from the slot (advanced deep dive, 2026-09-19), where Quentin Lake allows 0.17 FP/route (8th) and an 18.9% target rate (3rd) (magicsportsguy, 2026-09-18). Value: not publicly surfaced from allowed sources, so no salary-based value read is possible (The Huddle, published 2026-09-19; DK Network, dated 2026-09-15). The role case is the Week 1 usage table above (RotoWire, updated 2026-09-15).

93. **Malik Nabers (WR)** [NYG (@ LAR] — 67.0 | 9 (31.0%) | 38.0% | 69 | 2.88 | 11.1 | 40.2% — Pct: Route 34 · Tgt sh 95 [ELITE] · TPRR 91 [ELITE] · YPRR 87 · aDOT 54 · Air sh 88. Qual: route participation 67.0% > 50% and target share 31.0% > 15%.. Sal: $6,500 [2P] (DK Network, dated 2026-09-15). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: The Rams play 85.3% zone (StatRankings teams, 2026-09-18) and allowed 0.683 pass EPA/play in Week 1 (StatRankings teams, 2026-09-18); Jaxson Dart debuted 23-of-29 for 230 yards and 3 TDs in Week 1 (Sportradar via SNF/MNF addendum, 2026-09-19). Nabers (6/69 in his return ~350 days post-ACL; Fantasy Nerds/Yahoo, 2026-09-19) aligns 79.2% on the perimeter, so he primarily sees LAR's outside corners in their 85.3% zone scheme rather than slot defender Quentin Lake (magicsportsguy alignment data, 2026-09-18; advanced deep dive, 2026-09-19). Value: $6,500 [2P] (DK Network, dated 2026-09-15). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Tgt sh (95th percentile [ELITE]) and weakest at Route (34th percentile); all percentiles are qualifying-pool percentiles.

94. **Evan Engram (TE)** [DEN] — 58.0 | 5 (18.5%) | 26.3% | 43 | 2.26 | 6.4 | 27.2% — Pct: Route 15 [WEAK] · Tgt sh 56 · TPRR 76 · YPRR 73 · aDOT 32 · Air sh 58. Qual: route participation 58.0% > 50% and target share 18.5% > 15%.. Sal: $3,300 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Jacksonville allowed -0.493 EPA/play with 53.1% pressure and a 16.7% sack rate in Week 1 (defense-scheme lane, 2026-09-19); Bo Nix graded as QB31 across EPA/dropback, YPA and aDOT simultaneously (QB lane, 2026-09-19). Engram posted 4/43/1 (75.8 PFF) in Week 1 (Broncos Wire, 2026-09-15). Value: $3,300 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at TPRR (76th percentile) and weakest at Route (15th percentile [WEAK]); all percentiles are qualifying-pool percentiles.

95. **Courtland Sutton (WR)** [DEN] — 79.0 | 5 (18.5%) | 19.2% | 11 | 0.42 | 8.9 | 37.9% — Pct: Route 64 · Tgt sh 56 · TPRR 53 · YPRR 18 [WEAK] · aDOT 44 · Air sh 80. Qual: route participation 79.0% > 50%

and target share 18.5% > 15%.. Sal: $5,800 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Jacksonville allowed -0.493 EPA/play with 53.1% pressure and a 16.7% sack rate in Week 1 (defense-scheme lane, 2026-09-19); Bo Nix graded as QB31 across EPA/dropback, YPA and aDOT simultaneously (QB lane, 2026-09-19). Value: $5,800 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Air sh (80th percentile) and weakest at YPRR (18th percentile [WEAK]); all percentiles are qualifying-pool percentiles.

96. **Jaylen Waddle (WR)** [DEN] — 82.0 | 3 (11.1%) | 11.1% | 2 | 0.07 | 4.0 | 10.2% — Pct: Route 73 · Tgt sh 25 [WEAK] · TPRR 23 [WEAK] · YPRR 11 [WEAK] · aDOT 14 [WEAK] · Air sh 24 [WEAK]. Qual: route participation 82.0% > 50%.. Sal: $6,500 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Jacksonville allowed -0.493 EPA/play with 53.1% pressure and a 16.7% sack rate in Week 1 (defense-scheme lane, 2026-09-19); Bo Nix graded as QB31 across EPA/dropback, YPA and aDOT simultaneously (QB lane, 2026-09-19). Waddle managed 1 catch for 2 yards on 3 targets with a drop in Week 1 (Broncos Wire, 2026-09-15). Value: $6,500 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Route (73rd percentile) and weakest at YPRR (11th percentile [WEAK]); all percentiles are qualifying-pool percentiles.

97. **Pat Bryant (WR)** [DEN] — 58.0 | 6 (22.2%) | 31.6% | 42 | 2.21 | 3.9 | 19.8% — Pct: Route 15 [WEAK] · Tgt sh 74 · TPRR 88 · YPRR 72 · aDOT 13 [WEAK] · Air sh 48. Qual: route participation 58.0% > 50% and target share 22.2% > 15%.. Sal: $4,200 [2P] (The Huddle, published 2026-09-19). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Jacksonville allowed -0.493 EPA/play with 53.1% pressure and a 16.7% sack rate in Week 1 (defense-scheme lane, 2026-09-19); Bo Nix graded as QB31 across EPA/dropback, YPA and aDOT simultaneously (QB lane, 2026-09-19). Value: $4,200 [2P] (The Huddle, published 2026-09-19). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at TPRR (88th percentile) and weakest at aDOT (13th percentile [WEAK]); all percentiles are qualifying-pool percentiles.

98. **Travis Kelce (TE)** [KC] — 78.0 | 5 (20.0%) | 20.0% | 71 | 2.84 | 5.8 | 24.8% — Pct: Route 59 · Tgt sh 61 · TPRR 54 · YPRR 86 · aDOT 29 · Air sh 56. Qual: route participation 78.0% > 50% and target share 20.0% > 15%.. Sal: not publicly surfaced from allowed sources. Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Indianapolis plays 66.7% man and allowed 2.75 YPRR with 0.74 slot FP/route in Week 1 (StatRankings teams, 2026-09-18); Patrick Mahomes had no Week 1 completion travel more than 6 air yards (RotoWire, 2026-09-17). Kelce drew 5 targets for 71 yards in Week 1 (4for4/Sportradar via SNF/MNF addendum, 2026-09-19). Value: not publicly surfaced from allowed sources, so no salary-based value read is possible (The Huddle, published 2026-09-19; DK Network, dated 2026-09-15). The role case is the Week 1 usage table above (RotoWire, updated 2026-09-15).

99. **Rashee Rice (WR)** [KC] — 84.0 | 2 (8.0%) | 7.4% | 19 | 0.70 | 3.0 | 5.2% — Pct: Route 77 · Tgt sh 14 [WEAK] · TPRR 8 [WEAK] · YPRR 26 · aDOT 8 [WEAK] · Air sh 10 [WEAK]. Qual: route participation 84.0% > 50%.. Sal: $6,400 [2P] (DK Network, dated 2026-09-15). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Indianapolis plays 66.7% man and allowed 2.75 YPRR with 0.74 slot FP/route in Week 1 (StatRankings teams, 2026-09-18); Patrick Mahomes had no Week 1 completion travel more than 6 air yards (RotoWire, 2026-09-17). Rice managed 2 targets (7% TPRR) in Week 1; 4for4 (2026-09-17) expects his target earning to rise from that floor. Value: $6,400 [2P] (DK Network, dated

2026-09-15). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Route (77th percentile) and weakest at aDOT (8th percentile [WEAK]); all percentiles are qualifying-pool percentiles.

100. **Xavier Worthy (WR)** [KC] — 88.0 | 6 (24.0%) | 21.4% | 18 | 0.64 | 7.9 | 40.7% — Pct: Route 89 · Tgt sh 81 · TPRR 58 · YPRR 22 [WEAK] · aDOT 40 · Air sh 90. Qual: route participation 88.0% > 50% and target share 24.0% > 15%.. Sal: $4,500 [2P] (DK Network, dated 2026-09-15). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Indianapolis plays 66.7% man and allowed 2.75 YPRR with 0.74 slot FP/route in Week 1 (StatRankings teams, 2026-09-18); Patrick Mahomes had no Week 1 completion travel more than 6 air yards (RotoWire, 2026-09-17). Worthy is off the injury report (shoulder) and co-led KC with 6 Week 1 targets (A to Z Sports, 2026-09-16; 4for4, 2026-09-17). Value: $4,500 [2P] (DK Network, dated 2026-09-15). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at Air sh (90th percentile) and weakest at YPRR (22nd percentile [WEAK]); all percentiles are qualifying-pool percentiles.

101. **Tyquan Thornton (WR)** [KC] — 69.0 | 1 (4.0%) | 4.5% | 0 | 0.00 | 32.4 | 27.7% — Pct: Route 39 · Tgt sh 2 [WEAK] · TPRR 2 [WEAK] · YPRR 6 [WEAK] · aDOT 100 [ELITE] · Air sh 60. Qual: route participation 69.0% > 50%.. Sal: $3,400 [2P] (DK Network, dated 2026-09-15). Ancillary: Slot rate, first-read share, contested catches/drops, red-zone/inside-10 targets, man/zone splits: not publicly surfaced.. Matchup: Indianapolis plays 66.7% man and allowed 2.75 YPRR with 0.74 slot FP/route in Week 1 (StatRankings teams, 2026-09-18); Patrick Mahomes had no Week 1 completion travel more than 6 air yards (RotoWire, 2026-09-17). Value: $3,400 [2P] (DK Network, dated 2026-09-15). Against that salary, the Week 1 role (RotoWire, updated 2026-09-15) is strongest at aDOT (100th percentile [ELITE]) and weakest at Tgt sh (2nd percentile [WEAK]); all percentiles are qualifying-pool percentiles. --- ### Validation - 101 qualifying players: 101 PASS - 30 teams: 30 PASS - 15 games: 15 PASS - Zero excluded-player sections: PASS - Strict >50% OR >15% qualifier: PASS - Percentiles present (>=4 valid metrics each): PASS - Salary provenance (allowed sources only, [2P] on numerics): PASS - OUT/Doubtful qualifiers (Nico Collins, Zay Flowers, Jauan Jennings, Chig Okonkwo) have complete sections, not framed as playable: PASS ### Top five values (role vs salary, qualifying-pool math) Score = mean qualifying-pool percentile across available metrics minus salary percentile within the salaried pool. OUT/Doubtful players excluded; salaries [2P] from The Huddle (published 2026-09-19) or DK Network (dated 2026-09-15). 1. **Caleb Douglas (MIA WR)** — $3,700 [2P]; mean pool pct 79.7, salary pct 16.7, score +63.1. Flags: none. 2. **Mike Gesicki (CIN TE)** — $3,600 [2P]; mean pool pct 65.1, salary pct 14.3, score +50.8. Flags: Route[WEAK] TPRR[ELITE] YPRR[ELITE]. 3. **Roman Wilson (PIT WR)** — $3,200 [2P]; mean pool pct 55.1, salary pct 4.8, score +50.3. Flags: Route[WEAK] aDOT[ELITE]. 4. **Malik Washington (MIA WR)** — $4,000 [2P]; mean pool pct 79.9, salary pct 30.4, score +49.5. Flags: Route[ELITE] Tgt sh[ELITE]. 5. **Kalif Raymond (CHI WR)** — $3,600 [2P]; mean pool pct 63.6, salary pct 14.3, score +49.3. Flags: Route[WEAK] Tgt sh[ELITE] TPRR[ELITE] YPRR[ELITE]. ### Top five traps (salary vs role, qualifying-pool math) 1. **Rashee Rice (KC WR)** — $6,400 [2P]; mean pool pct 23.8, salary pct 86.9, score -63.1. Flags: Tgt sh[WEAK] TPRR[WEAK] aDOT[WEAK] Air sh[WEAK]. 2. **Jaylen Waddle (DEN WR)** — $6,500 [2P]; mean pool pct 28.6, salary pct 89.3, score -60.7. Flags: Route[ELITE] TPRR[WEAK] YPRR[WEAK]. 4. **Chris Godwin (TB WR)** — $5,600 [2P]; mean pool pct 35.6, salary pct 76.2, score -40.5. Flags: Route[ELITE] aDOT[WEAK] Air sh[WEAK]. 5. **Terry McLaurin (WAS WR)** — $5,200 [2P]; mean pool pct 35.1, salary pct 69.0, score -34.0. Flags: Route[ELITE] TPRR[WEAK] YPRR[WEAK] aDOT[WEAK] Air sh[WEAK]. ### Injury beneficiary whose salary did not adjust **Mark Andrews (BAL TE) — $4,400 [2P]** (The Huddle, published 2026-09-19). Zay Flowers (hamstring) is doubtful and not expected to play

(baltimoreravens.com; Ravens Wire/Jeff Zrebiec, 2026-09-18), which condenses Baltimore's targets toward Andrews — he already tied the team lead with 6 targets (25.0% share, RotoWire, updated 2026-09-15) with no in-room receiving competition (advanced deep dive, 2026-09-19). DK Network's 2026-09-17 TE rankings price him as TE22 with 7.8 projected PPR (advanced deep dive, 2026-09-19) — a ranking published **before** Flowers' 2026-09-18 doubtful designation, so the salary does not reflect the condensed target tree. ### Source ledger - RotoWire, “NFL Box Score Breakdown Week 1” — article updated 2026-09-15, observed 2026-09-19: https://www.rotowire.com/football/article/nfl-box-score-breakdown-week-1-recap-usage-stats-134247 - The Huddle, “DFS Fantasy Domination: Week 2” — published 2026-09-19: https://www.thehuddle.com/story/sports/fantasy/football/2026/09/19/dfs-fantasy-domination-week-2/91767114007/ - DK Network Week 2 rankings/salaries — dated 2026-09-15 (primetime salaries; endpoint Akamai-blocked, second-party). - deep/coverage-matchups-2026-09-19.md — research date 2026-09-19. - deep/advanced-matchups-deep-dive-2026-09-19.md — research date 2026-09-19. - deep/snf-mnf-addendum-2026-09-19.md — research date 2026-09-19. - verify/injury-status-final-2026-09-19.md — compiled 2026-09-19 ~11:00 CT (Sept 18–19 sources). - deep/games-phase1/2/3.md and deep/consensus-map.md — research 2026-09-19 (lines/totals).

4.4 Defense / Special Teams

DST	Salary [2P]	Wk1 profile	Stance
Jacksonville	$2,400	53.1% pressure (2nd), 16.7% sack% (1st), #3 Wk1 DST; +5.04 INT luck (takeaway regression risk)	Best pressure mismatch (vs DEN 56.3% allowed); pressure, not INTs, is the thesis
Tampa Bay	$3,600	45.9% blitz (4th) vs Watson (PFF 40.1, 16.7% sack rate); The Huddle's own recommended-lineup DST	Elite spot; note §2's L2 salary correction
Kansas City	—	54.3% pressure (1st); 12.1% sack% (4th); 2.2% explosive (2nd); most dominant Wk1 rush line (53.1% on Willis, 5 sacks)	BAD for IND — among slate's worst
LA Chargers	—	New DC O'Connell; 2025 propped by +7.11 INT luck (2nd-highest)	**Human override: downgraded** (INT luck)
San Francisco	$3,800	−5.28 INT luck (positive regression); 2025 forced pressure 8.1% (2nd-worst); case = MIA 40.5% allowed + Willis	Fade-ish; #25 Wk1 finish was prior-driven
New England	—	Blitz 48.1% (3rd); 0.58 perim FP/rr (3rd); 2025: 4th pts, SB LX	Worst matchup for PIT
Pittsburgh	—	96.2% zone (1st), 10.5% blitz (league low); zone rating 75.3 (1st); 25.0% explosive (tied 3rd-worst); +3.23 INT luck	Scheme-inverted unit
Houston	—	Sack% 11.1% (5th); 44.4% pressure (4th); −1.49 EPA/play allowed blitzing	LEAN-GOOD
Denver	—	Man 58.6% (3rd); blitz 45.5% (5th); PROE +20.4 (1st); missed tackles 26.1% (32nd)	Strength-on-strength vs JAX
Philadelphia	—	+19.0 PROE (2nd); 45.0% pressure (tied 3rd)	BAD for TEN
Baltimore	—	Pass D 96.8 percentile	NO can't keep up through air
Seattle	—	−0.110 EPA/play; 86.1% zone (2nd); 79.2 man rating (tied 1st); SB LX champs	BAD for ARI

DST	Salary [2P]	Wk1 profile	Stance
Green Bay	—	−0.047 EPA/play; 48.4% blitz (2nd); −5.00 INT luck	LEAN-GOOD for NYJ
Minnesota	—	80.4% blitz; 96.8 percentile pressure (GSE-lab); 62.7% six-up (1st)	Weather game
NY Jets	—	−0.264 EPA/play; **−10.08 INT luck (highest positive regression)**; 79.2 man rating (tied 1st)	Takeaway regression candidate
Cincinnati	($2,700 — attribution ambiguous)	Pass D 87.1 percentile; pressure forced 12.9	CIN/CAR $2,700 conflict — do not use
Carolina	($2,700 — attribution ambiguous)	+0.360 EPA/play allowed (worst); 45.0% pressure (tied 3rd)	Same conflict — do not use

CIN/CAR $2,700 conflict: two files attribute a $2,700 DST salary to Cincinnati and Carolina respectively; unresolved — excluded from builds.

---

§5 — GSE-Lab Tables

Direct lab inputs used (research 2026-09-19; Garrett's own data, mined after his 9/19 challenge — previously only X/second-party sources were used): - `docs/research/2026-09-17/gse-lab/unit_matchups_2026.csv` - `docs/research/2026-09-17/gse-lab/rush_pressure_2026.csv` - `docs/research/2026-09-17/gse-lab/turnover_luck_2026.csv` - 2025/2026 `team_metrics` tables (same lane)

Unit matchups — the 12 core one-game findings (percentiles; all Week 1 2026 descriptions unless labeled 2025): 1. Dallas pass defense: **3.2nd percentile** — the single worst unit grade in the lab. 2. JAX pass defense **100th** vs Denver pass offense 9.7; Denver rush defense **0.0**. 3. Cleveland pass offense **0.0** vs Tampa pass defense 67.7. 4. LV pass/rush offense 67.7/87.1 vs LAC pass defense 16.1. 5. Baltimore rush offense **96.8**. 6. SF pass/rush offense 80.6/93.5 vs Miami pass/rush defense 32.3/12.9. 7. KC rush offense **100th** vs Indianapolis rush defense **3.2** — the most lopsided unit matchup in the lab. 8. Chicago pass/rush offense 90.3 (tempered: Week 1 opponent + weather). 9. NYG pass offense 96.8 vs Rams pass defense 19.4. 10. Rams rush defense 6.45 vs NYG rush offense 71. 11. Cincinnati pass defense 87.1 — but their pressure forced only 12.9 ("good coverage, no rush"). 12. Baltimore pass defense **96.8** — the primary counterargument to any NO pass-game piece (the leverage solver's Olave was human-overridden out on this number).

Rush/pressure ledger (`rush_pressure_2026.csv` + raw pressure files): - Wk1 generated: KC 56.3%, JAX 50.0%, CAR 44.7%, CIN 44.4%, WAS 42.4%, PHI 41.0%, LV 40.5%. - Wk1 allowed: DEN 56.3% (the JAX DST thesis), MIA 40.5% (hawkblogger). - MIA generated only 6.5% (worst). - 2025 priors: SF forced pressure 8.1% (2nd-worst — the SF DST case is opponent-driven, not theirs); DEN pressure differential 21.5% forced / 10.2% allowed (elite).

Turnover luck 2025 (`turnover_luck_2026.csv`) — regression signals, not projections: - Thrown INTs over expected: CLE +7.11, LV +7.74, MIA +6.82, MIN +5.74 (due fewer); DAL −5.24, CHI −4.33 (due more). - Takeaways over expected: CHI +7.22, LAC +7.11, JAX +5.04 (due fewer — the LAC DST downgrade and the JAX "pressure, not INTs" thesis); NYJ −10.07 (highest positive regression — takeaway candidate). - Forced fumbles over expected: TB +6.58, DET +6.52, MIA +4.97, MIN +4.66 (due fewer); DEN −4.50, GB −6.17 (due more).

2025 full-season team metrics are in §1's table. **2026 Wk1 EPA standouts** are in §1. **Special teams 2025** was read in the raw lane; no slate-actionable edge was extracted (see raw file for the table).

Contamination correction (recorded 9/19, binding): the lab crosscheck originally implied three GSE sources were integrated. In fact: (a) `props-consensus/our_projections.csv` and `game-projections.md` are **stale TNF material dated 2026-09-17** (BUF–DET) — never Week 2; (b) **current Week 2 player props were NOT used** anywhere in this dossier; (c) the Neon GSE DB was **not queried**, and its `picks` table holds spread/moneyline/total picks only — **no prop market**. Do not claim "all three" GSE sources were integrated. The optimizer below ran on DKN/FP/OWS/FIC projections, not props.

---

§6 — Optimizer Results

The exact solver (Garrett's repo, run 2026-09-19): `apps/web/lib/fantasy/dfs-optimizer.ts`, `optimizeOne`, stack enabled. This is the repo's own DFS optimizer — not a third-party tool. **Pool:** 131 players — 51 RB, 26 TE, 20 QB, 18 WR, 16 DST. **Projections:** 77 DKN, 21 FantasyPros, 12 OWS, 9 FIC (priority DKN > FP > OWS). **Ownership:** 86 of 131 values are positional estimates (OWS-based). **Floors/ceilings:** mechanically set to 0.55×/1.6× projection (not model-derived). A WR/TE team-mapping bug was found and corrected before the final rerun. Salaries were the [2P] set — still lobby-unverified.

Cash solver — 159.2 projected, $50,000: Stroud ($5,500) / Henry ($7,200) / Jeanty / JSN ($8,100) / Christian Watson ($6,200) / Hutchinson ($3,500) / Schultz ($3,200) / Swift ($6,300) / **LAC DST**.

Leverage solver — 142.7 projected, $49,600: Lock / Swift / Etienne / JSN / Olave / Christian Watson / Ferguson / Hutchinson / **Tampa Bay DST**.

Human overrides applied (Garrett's data overruling the solver): 1. **LAC DST downgraded** — ≈+7.11 INT luck in 2025 (2nd-highest); the unit's 2025 was takeaway-propped. 2. **Olave removed** — Baltimore's pass defense grades 96.8th percentile; NO's pass offense 38.7. The leverage lineup's Saints piece does not survive the lab. 3. **Ownership totals are unreliable for Garrett's 15-game slate** — public pOWN is a 13-game-main-slate product; SNF/MNF pieces (Taylor, Walker, Nabers, Puka, Adams, Kyren, Dart, Likely, Skattebo, Kelce, Rice, Worthy) have no usable public ownership. Treat all pOWN as directional.

18-WR optimizer pool note: the solver's WR pool was 18 players (not the 101-player role pool in §4.3). Nabers and Coker sit outside it — which is why L2 (§2) is flagged as not solver-generated. The 131-player pool's full membership is in the crosscheck file (`gse-lab-and-optimizer-crosscheck-2026-09-19.md`).

18-WR pool membership caveat: pool membership ≠ endorsement; several pool members carry trap flags in §4.3 (Godwin, Rice, Waddle, McLaurin, Chase).

---

§7 — Weather Watch

Game	Condition (Sunday-morning state, 2026-09-20)	Fantasy adjustment
MIN @ CHI	**Main concern.** Rain, sustained ~13 mph, gusts 23–30 mph, ~69°F, 3-of-5 impact	Downgrade deep passing, Caleb air attack, Jefferson deep equity, Swift receiving, kicking; premium on checkdowns/ rushing
NYJ @ GB	Rain, gusts ~18 mph	Mild downgrade to pass games; checkdown premium
NE @ PIT	Rain increasingly likely in 2nd half	2nd-half passing downgrade; monitor
CLE @ TB	Heat/humidity; PM thunderstorm/delay risk	Delay scrambles inactives/roles — monitor; heat favors rushing QBs slightly
IND @ KC (SNF)	Minor rain/wind, gusts ~15 mph, 75°F, 25% rain	No major adjustment
MIA @ SF	~72°F, clear	Ideal — no adjustment
PHI @ TEN	94–99°F heat	Rushing QBs (Hurts) less heat-sensitive; mild contrarian OVER input on 39.5; slow pace (TEN 14.0/sec) is the headwind
Dome/roof-protected	NYG @ LAR (dome), HOU (roof), DAL (roof), etc.	Safe

Sources: raw `weather.csv` + `qb-weather.csv` (9/19), September 20 morning sweep files, StormTeam 5 via Patriots Wire (9/18). **Hard gate: refresh before lock** — wind readings at Soldier Field and any CLE@TB delay watch are the two live items.

---

§8 — Referees & MNF History

MNF history (2019–2024 seasons): average combined score **44.30** (home 22.14, away 22.17 — essentially even). 2020–2024 MNF unders ≈ **71%**. 2025: 9 overs, 11 unders (regression toward even). Favorites of 7+ on MNF: **26-39-2 ATS since 2012** — laying 7.5 with LAR is historically expensive. Applied to NYG@LAR (48–48.5 total): the under has the historical edge, against a 48+ total.

Extracted crews (4 of 15 games — the other 11 have no crew data in the corpus; gap): - **CIN @ HOU — Adrian Hill:** the strongest under lean of the extracted crews. - **MIA @ SF — Shawn Smith:** the largest over lean of the extracted crews. - **CLE @ TB — Brad Rogers:** high-flag crew, 58-50 career to the over. - **NYG @ LAR (MNF) — Brad Allen:** 83-60-1 to the under since 2016 — aligns with the MNF under trend.

Statistical honesty note (RotoWire): only Alan Eck's low penalty rate survived multiple-testing correction. Every other crew tendency in this section is a tiebreaker, not an edge. Do not build a lineup around a referee.

---

§9 — Injury / Status Watch

Official inactives: ~11:30 AM CT Sunday 2026-09-20 — HARD GATE. Everything below is pre-inactive reporting; statuses marked Q/Doubtful must be rechecked.

OUT / IR / inactive (corpus-confirmed): - Sam Darnold (SEA) — OUT (glute); Drew Lock starts. - Brock Purdy (SF) — OUT (toe); Mac Jones starts (**salary unknown**). - J.J. McCarthy (MIN) — concussion protocol; Carson Wentz starts. - Michael Penix Jr. (ATL) — inactive. - Nico Collins (HOU) — OUT (hamstring, G1). - Tua Tagovailoa (MIA) — doubtful (toe); Malik Willis starts. - Jordan Mason (MIN) — IR (placed 9/16). - Paulson Adebo (NYG) — IR. - Dylan Sampson (CLE) — IR (knee). - Chig Okonkwo (WAS TE) — OUT (hamstring). - Jauan Jennings (SF) — OUT. - Luvu (DAL) — OUT; Hooker (DAL) — IR (forearm), out; Overshown (DAL) — hammy, out. - Chop Robinson (MIA) — OUT (concussion); Harrison (MIA) — OUT; Louis + Moore (MIA) — IR. - Darien Porter (LV CB) — OUT. - Tonges (SF) — IR. Pearsall, Kirk (SF) — IR. - Molden (LAC) — OUT. - Garrett (LAR) — IR (knee surgery, min 4 weeks). - George Kittle (SF) — limited (Achilles); ramp, not full role.

Doubtful / not expected: - Brock Bowers (LV) — doubtful (knee; meniscus trim 9/8); confirm pregame. Mayer is ELITE if he sits. - Zay Flowers (BAL) — doubtful, not expected (9/18); Andrews condenses.

Questionable / check before lock: - Ladd McConkey (LAC) — Q (rib), limited Fri, on track. - Michael Pittman (PIT WR) — Q (foot), DNP Thu/Fri, trending OUT. - Chris Olave (NO) — Q. - RJ Harvey (DEN) — Q (hammy); was DEN's best-graded offensive player (74.3). - Tetairoa McMillan (CAR) — Q (knee), full practice, game-time. - Puka Nacua (LAR) — Friday DNP (hip); recheck Saturday. - Deonte Banks (NYG) — calf, DNP Fri, day-to-day. - Carlton Davis (NE) — Q (neck), DNP all three practices. - Van Ness (GB), O'Neill (MIN), Bradford (SEA), Cedric Gray (TEN) — limited participants. - Joe Burrow (CIN) — Q (back), full Fri practice, expected to play. - Aaron Donald (LAR) — "expects to play" (981 days; snaps unsourced).

Salary-unknown starters (cannot be built until lobby): Mac Jones (SF), plus any SNF/MNF salary not in the [2P] set (Stafford and several primetime salaries were never surfaced).

---

§10 — Open Gates & Next Steps

Hard gates (must clear before anything is entered): 1. **Lobby salary verification** — every [2P] salary becomes verified or replaced. DK endpoint was Akamai-blocked 9/19; retry game-day. 2. **Official inactives ~11:30 AM CT Sunday** — Bowers, Flowers, Nacua, Banks, McConkey, Pittman, Olave, Harvey, McMillan, Burrow, Kittle, Davis decisions. 3. **Weather refresh** — Soldier Field wind/rain readings; CLE@TB delay watch; NE@PIT 2nd-half rain. 4. **Puka Nacua Saturday report** (hip DNP Friday) and **Deonte Banks** (calf DNP Friday). 5. **SNF/KC-backfield and MNF salary confirmation** — Walker $6,500, Taylor $7,500, Nabers $6,500, Skattebo $5,900, Kyren $6,400, Dart $5.8K, Kelce (unknown), Stafford (unknown), Mac Jones (unknown) are all primetime [2P] or missing. 6. **15-game ownership** — no public source covers Garrett's contest; build ownership assumptions from the 13-game data directionally only, or seek a 15-game-inclusive source. 7. **L2 rebuild authorization** — L2 is invalid at $51,000; L2b ($49,400, Coker→Hutchinson) is a suggested mechanical fix, not approved.

Unresolved corpus conflicts (do not use until resolved): - Jerry Jeudy: DEN/$5,100 vs CLE/$3,900. - CIN/CAR DST: $2,700 attribution. - Daniels pressure: PFR 18.4% vs PFF 42%. - Romeo Doubs: NE (pool file) vs GB (other lanes). - Romeo Doubs: NE (pool file + ThunderDanDFS opp column) vs GB (other lanes) — leans NE, not fully resolved. - Mike Evans on SF: single-source (pool file), uncorroborated. - Josh

Jacobs on Commissioner's Exempt List (9/19 report) — verify; Lloyd's 63% XFP share depends on it. - Surtain shadow role — UNVERIFIED.

Recommended build order once gates clear: verify salaries → apply inactives → re-run the repo optimizer (`dfs-optimizer.ts`, `optimizeOne`, stack enabled) on the verified-salary pool → apply the two human overrides (LAC DST fade, Olave out) → weather-adjust MIN@CHI/NYJ@GB/CLE@TB → finalize L1, rebuild L2 → Garrett's explicit authorization before entry.

---

§11 — Source Index

Every file read, by directory, with research date. "Read" = full content extracted into the working notes that built this dossier. Deliberate exclusions are listed after.

11.1 Deep research (39/39 Markdown, 2026-09-19-dk-week2/deep/)

25 TNF/off-slate tables (BUF–DET game, Cook/Gibbs/Allen/Bills rows) receive one-line coverage notes rather than full extraction — the game is off-slate. All other tables are fully extracted in §§1–10.

11.4 Chart reads (6/6, 2026-09-18/chart-reads/ — approximate reads, labeled as such)

1. gridironinfo-4man-rush-week1.csv
2. gridironinfo-blitz-epa-week1.csv
3. gridironinfo-int-badthrow-vs-adot-week1.csv
4. paganetti-run-consistency-week1.csv
5. paganetti-success-rates-week1.csv
6. sfdata9ers-cpoe-vs-ttt-week1.csv

11.5 StatRankings methodology (1/1, 2026-09-18/statrankings/)

- methodology-definitions.json — read; 673 definitions including non-NFL (NBA) entries. Non-NFL definitions are non-actionable and were not reproduced. NFL-applicable metrics used: PROE+, ARBY, CoverageIQ, PROE (pressure rate over expected), team scheme/coverage metrics. Team-affiliation fields in StatRankings can be stale — metrics used only after roster-context check.
- nfl-urls.txt — supplementary link list; not analysis content.
- js/ — site code; deliberately excluded (not research content).

11.6 September 20 additions (5/5, 2026-09-20/full-tables/)

- README.md
- magicsportsguy-personnel-usage-new-ocs-2026vs2025.csv — **ACTIONABLE/CONTEXT**: 11-personnel rate shifts under new OCs (2025→2026): MIA (Slowik) 45.9→70.9 (+25.0pp), CLE (Switzer) 47.8→70.6 (+22.8), ARI (Hackett) 53.5→70.8 (+17.3), TB (Robinson) 69.9→82.1 (+12.2), PIT (Angelichio) 49.1→60.9 (+11.8), BAL (Doyle) 31.0→42.2 (+11.2), PHI (Mannion) 63.2→71.7 (+8.5). Supports 3-WR usage for MIA (M. Washington), CLE (Concepcion), TB (Egbuka), PIT (Metcalf/Wilson).
- raritosfootball-qb-ratings-top10-week2.csv — used in §4.1 (Geno 9.3/0.37 EPA/db; Caleb composite #1 inputs).
- raritosfootball-team-nota-del-1-al-10-week2.csv — used in §3 (CHI attack 9.5/defense 3.4; NE pressure 55.6%).
- thunderdandfs-wr-coverage-upgrades-week2.csv — **ACTIONABLE with flags**: author's own model (data source unstated; 80% 2025 + 20% Wk1 blend). The table's second column is the **opponent**, which resolves two corpus team conflicts: Diggs's opp is DAL → Diggs plays for **WAS** (adopted); Doubs's opp is PIT → Doubs plays for **NE** (supports the pool file); Deebo's opp is MIA → **SF**; Waddle's opp is JAX → **DEN**; Njoku's opp is LV → **LAC** (Njoku on the Chargers per this table — single-source, flagged). **Anomaly:** the Freiermuth row reads opp PIT, which would place him on NE — contradicts the corpus (PIT's TE); flagged, not resolved. Top upgrades cited in §§3–4: McLaurin +0.56, Metcalf +0.37, Deebo +0.33, Chase +0.29, DeVonta +0.25, Diggs +0.18, Pickens +0.17, Coker +0.16, Odunze +0.16, London +0.16, Goedert +0.15, C. Watson +0.15, Lamb +0.15, Freiermuth +0.15, Loveland +0.14, Schultz +0.12, Hutchinson +0.10.

11.7 Working extraction files (scratch, /tmp/ — not part of the repo)

dossier-extract-A through G (consensus/games, position phases, QB/RB pools, WR/TE pool, advanced metrics, sweeps/lab/refs, raw, tables/charts, 2026-09-20 additions) and wrte-compact.txt (the 101-player compact list, generated programmatically from the source file). These are build scaffolding, not sources.

11.8 Table coverage addendum (treatment for tables not otherwise traced in §§1–10)

- gridironinfo-air-yards-buckets-week1.csv — **CONTEXT**: 0–5 air-yard share leaders: Rush 72.7%, Nix 71.4% (dink profiles) — supports the Rush-unplayable and Nix-fade reads in §4.1.
- paganetti-rush-ypa-regression-week1.csv — **CONTEXT**: KC +2.8 and CHI +2.0 overperformed expected rush YPA (mean-regression candidates; n=1).
- patton-any-a-leaders-week1.csv — **ACTIONABLE**: Lawrence 13.1 ANY/A #1 (supports the Game 9 efficiency crown); L. Jackson 12.0 #2 (off-slate).
- patton-playcaller-tendencies-week1.csv — **APPROXIMATE** (bar reads): Coen (JAX) 0.27, Shanahan (SF) 0.18 tendency ratings.
- statyx-qb-volume-vs-efficiency-week1.csv — **ACTIONABLE**: Shough 61 dropbacks / 410 yds / 3 TD / −0.017 EPA/db (volume without efficiency); Love 46 / 387 / 2 / −0.059.
- paganetti-two-back-vs-mof.csv — **CONTEXT**: two-back formations 0.10 rush / 0.26 pass EPA/play vs MOF-open coverages (Wk1, 97 rush / 46 pass plays).
- benbbaldwin-remaining-sos-2026-09-18.csv — **CONTEXT** (not Week 2 actionable): remaining-SOS% leaders Cardinals 55.6, Chargers 55.3.
- tejfbanalytics-qb-total-epa-week1.csv — **ACTIONABLE**: Dart 22.6 total EPA #1 (0.67 EPA/db, 0.28 under pressure); Caleb 18.7 (0.49 EPA/db, 0.63 under pressure).
- cmain7-schedule-adjusted-ev-survivor-week3.csv — **NON-ACTIONABLE for DFS** (survivor-pool EV; Raiders/Cardinals 1559).
- statyx-te-targets-week1.csv — **ACTIONABLE**: McBride 13 tgts / 35.1% / +0.289 EPA/tgt #1; Schultz 8 / 22% / −0.315 (volume over efficiency — the CIN-LB matchup, not Wk1 efficiency, is the Schultz thesis).
- cmain7-sf-ros-win-prob.csv — **CONTEXT**: SF W2 win prob 89.3% (peak) — cited in Game 13.
- fantasypts-similarity-finder-washington.csv — **ACTIONABLE**: P. Washington comps — cited in Game 9.
- All other non-TNF tables are **EXTRACTED** — their numbers appear in §§1–10 (bellcow shares, pressure rates, coverage splits, YPRR elites, tempo, trench data).

Deliberate exclusions (with reasons)

- `2026-09-18/ftn/` — API catalog, not analysis.
- `2026-09-18/statrankings/js/` — site JavaScript, not research content.
- Pure BUF–DET TNF/off-slate tables (25 files) — off-slate game; one-line coverage notes instead of full extraction.
- Non-NFL definitions in methodology-definitions.json — non-actionable.

- Raw Minis extract rows: Derek Carr, Sean McAllister, corrupt Kelce-vs-DEN row (dropped as corrupt/stale); Purdy projection/ownership (stale — Purdy OUT).
- 2026-09-18 gse-lab `props-consensus/our_projections.csv` and `game-projections.md` — stale 2026-09-17 TNF material, not Week 2.

Corrections & Contamination Ledger (binding — do not regress)

1. Isaiah Likely is a **New York Giant**. All Andrews-leverage arguments using "Likely the Raven" are void.
2. Michael Pittman Jr. is **Pittsburgh's** WR. Chig Okonkwo is **Washington's** TE. Antonio Gibson is on **Cleveland**. J. Walker is a **Chief**. Jaylen Waddle is a **Bronco**. Deebo Samuel is a **49er**. These are the corpus's 2026 assignments — preserved as-source, flagged where single-sourced.
3. Purdy is OUT; Mac Jones starts (salary unknown). Bowers is doubtful (meniscus trim 9/8). Puka Nacua had a Friday DNP (hip). Zay Flowers doubtful/not expected. Collins, Jauan Jennings, Okonkwo OUT. McConkey, Pittman, Olave, Harvey Q.
4. PIT is zone-heavy (96.2%) and low-blitz (10.5%) — not a man-blitz defense.
5. StatRankings team affiliations can be stale — metrics only after roster check.
6. "14 Sunday games" is wrong — Garrett's contest is **15 games**.
7. Ben Baldwin v2 (9/18) superseded by v3 (9/19).
8. sfdata9ers-week2-previews.csv has mislabeled rows ("Texans @ Browns," "Raiders @ Bills," "Panthers @ Bears") — usable rows only.
9. The methodology file and several charts contain approximate reads — labeled approximate.
10. Never claim Week 2 player props, the Neon GSE DB, or "all three" GSE sources were used — they weren't (§5 correction).
11. L2 as constructed is **invalid** ($51,000); TB DST is $3,600 [2P], not $2,600.

End of dossier. Assembled 2026-09-20 from the complete corpus. All salaries [2P] until lobby verification. Official inactives ~11:30 AM CT. Weather refresh before lock. No lineup is entered, published, posted, or sent without explicit authorization.
